Insight

In Multicultural and Gender Studies you start making the world you want to see when you join us in the classroom and in the department. Multicultural and Gender Studies (MCGS) is the academic face of justice, equity, diversity, and inclusion at California State University, Chico, ever striving to embody, inculcate, promote, and celebrate the values of multicultural respect, awareness, and understanding as fundamental to the socially and environmentally responsible democratic citizen. We are a diverse community of scholars and activists working together to critically examine gender, sexuality, socioeconomic class, ability, race, and ethnicity and to cultivate social justice through informed activism.

The department is strongly committed to helping students become responsible and responsive citizens of their communities, countries, and world. Given that rigorous academic learning is most effective when linked with community work, MCGS students put to use what they've learned about diversity and social justice in three-unit service/activism internships. Students may do their internship fieldwork in such campus organizations or off-campus sites. These internships are letter-graded and thus require close work with a faculty advisor/supervisor, providing the best hands-on learning.

Experience

Every year the College of Behavioral and Social Sciences and the Department of Multicultural and Gender Studies select students to represent and give voice to the departments. MCGS faculty advise and support several student organizations such as MEChA, Native American Club, Hmong Student Association, Dream Center, and GSEC and its various programs.

The Gender & Sexuality Equity Coalition (GSEC). This is a student-run activist organization that strives to empower all students through its three programs: the Women's Program, the Queer Program, and the Trans Program. The GSEC challenges societal norms that have been used to oppress and marginalize, by providing opportunities for leadership, personal development, and referral services. We offer a safe and inclusive space where the campus and community can effectively support the academic mission of the university.

- **Women's Program**—utilizes intersectional feminist ideologies to offer educational opportunities and programs that are centered on diverse women's experiences. This program seeks to create and sustain a safe university environment that promotes personal growth.
- **Queer Program**—provides holistic LGBTQ+ education, to sustain a safe campus environment, and to cultivate community for all queer people affected by heterosexism. This program is dedicated to promoting accessible, affirming, and empowering spaces for sexually and romantically diverse people of all intersecting identities.

- **Trans Program**—fosters accessibility, community building, and empowerment for all trans and gender-diverse people by challenging institutional and interpersonal oppression perpetuated by cissexism and transphobia. This program uses intersectional theory when providing support for people of all genders and sex identities.

We offer several financial opportunities for our students. Chico State scholarships require completion of the online scholarship application, which can be obtained through the Financial Aid and Scholarship Office (<https://www.csuchico.edu/fa/>).

Outlook

Alumni have gone on to do many things with their degrees in MCGS. They have gone to graduate school in many different fields and become professors. They have become K-12 teachers, community and union organizers, social workers, congressional aides, policy analysts, journalists, lawyers, public advocates, artists/graphic designers, small business owners, and much more.

Typically Offered: Fall and spring

This course represents an overview of health care issues faced by women throughout the life cycle. The course begins an examination of scientific inquiry and the study of disease in women. Then, using sociological, political, and behavioral sciences, the roles, rights, and responsibilities of women in the health care system are assessed. The course concludes with a biological review of the female body and specific health care problems common to women. This course encompasses a woman-centered philosophy which encourages women's active participation in their health care decisions. 3 hours discussion. (004381)

WMST 443 Gender and Sexuality in Early America**3 Units****Typically Offered:** Spring only even years

This course explores the political, economic, legal, social, and cultural dimensions of early American gender history, running from pre-contact Native American society through the period of the early American republic. It examines women's daily lives and experiences, illustrating shifting definitions of femininity and masculinity as crosscut by race, ethnicity, class, sexual orientation, region, and religion. Through discussion, readings, and research, this seminar illustrates themes that circumscribed women's opportunities in early America: sexuality, reproduction, and women's bodies; the political and legal status of women; women's labor, paid and unpaid; women in war; education and literacy; and consumption, among others. 3 hours lecture.
