

HEALTH PROMOTION MINOR

The Minor in Health Promotion provides students with a cursory view of important health issues, the public health system, and health promotion techniques. This information applies to our individual lives as well as complementing a variety of majors. The minor would be a great complement for students in many majors including communications, child development, nutrition, nursing, psychology, sociology, social work, recreation, and others.

Course Requirements for the Minor

The following courses, or their approved transfer equivalents, are required of all candidates for this minor.
