Experience
History is unique: no field of knowledge is alien to it, since history encompasses all knowledge about the past. The study of history is a supportive and integrative discipline, designed to broaden your knowledge of the past and to support your study in other areas. Our department encourages students to minor or to take it as a second major.

By providing practical experience in local museums, libraries, and public archives, internships help students prepare for jobs in public agencies or business.

The faculty of the history department at California State University, Chico are highly trained and experienced with a reputation for popular teaching and serving student needs. Most have published their research, and others have work in progress. Together they offer a diversity of survey and upper-division courses in a wide range of fields.

Outlook
The study of history can lead to professional work in the field as a teacher or professional historian in governmental and private agencies. It is also valuable for those going into other professions, such as government service, law, librarianship, business, journalism, and publishing.

But also, the study of history produces the kind of person who is capable of handling many different jobs and positions where the knowledgeable, the intelligent, the humane, and the perceptive are in demand. People who have a broad understanding of their society, have critical thinking skills, and who have command of the English language, spoken and written, are of high value in many fields and to thousands of employers. This means that history majors have a wide variety of careers open to them.
