Chair: Todd J. Greene

Insight
Earth and Environmental Sciences encompasses an interdisciplinary suite of studies, all engaged to better understand the Earth and the environmental problems facing us. By integrating principles of physics, chemistry, biology, and mathematics, as well as quantitative and critical thinking skills, our graduates address geological and environmental issues related to the solid earth, the biosphere, hydrosphere, and the atmosphere. We are a department focused on providing students with opportunities to conduct applied and basic research in an effort to understand physical processes on and within the Earth and human influences that affect the environment.

The department offers two undergraduate degrees and two graduate degrees at the master’s level. The BS in environmental science prepares students for careers in areas such as pollution remediation, resource conservation, or environmental management, as well as providing a firm foundation for graduate studies. Graduates with the BS in geology have gone on to careers in soil and water resources, mining, environmental protection, and as park naturalists. Graduate students use their advanced degrees to further their careers in the geological and environmental sciences, working for both public and private agencies. In keeping with the interdisciplinary nature of the department, the faculty represent diverse academic areas, complemented by industrial experience. All have a strong commitment to excellence in teaching and engage in professional development.

Experience
Our department offers many opportunities for students outside the classroom. Our student group, the Association of Geological and Environmental Students (AGES), is open to everyone. AGES hosts several off-campus field trips each semester. Many majors are also members of national organizations such as the American Geophysical Union, Groundwater Resources of America, American Meteorological Society, and the Geological Society of America. Lecture courses are accompanied by laboratories, discussions, and field trips. Internships and work experience are also available.

Students have many opportunities to engage in research with faculty. We are very proud of the excellent research facilities we have developed over the years with support from national funding sources such as the National Science Foundation, National Oceanic and Atmospheric Administration, and NASA. Department equipment and facilities are extensive and include equipment for field and laboratory work in environmental science, geology, and hydrology/hydrogeology including cutting edge geochemical analysis, field environmental sensors, and tools for studying wind and atmospheric turbulence. In recent years, our undergraduate students have been involved in a number of research studies from the effects of local wildfires to modeling volcanic eruptions and international projects in Europe, South America, and Africa.

Outlook
Employment opportunities are excellent and growing as society accepts the challenges we face with climate change and loss of water resources. Our graduates work for agencies such as the California Department of Water Resources, the United States Geological Survey, and the Environmental Protection Agency. Graduates are also employed by private companies specializing in mineral and petroleum exploration, engineering or environmental consulting, and pollution remediation. Graduates with a bachelor’s degree find entry-level positions that involve gathering and interpreting scientific data, while management and field-oriented research positions generally require a master’s degree.

Programs
Undergraduate
Bachelor’s
• Environmental Science BS (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/earth-environmental-sciences/environmental-science-bs/)

See Course Description Symbols and Terms (https://catalog.csuchico.edu/academic-standards-policies/course-description-symbols-terms/) for an explanation of course description terminology and symbols, the course numbering system, and course credit units.

ERTH 101 Our Changing Planet 3 Units GE
Typically Offered: Fall and spring
Earth materials, processes, and history, and their significance to humans in California and societies around the world. No college credit for students who have passed ERTH 102. 2 hours activity, 2 hours lecture. (004067)
General Education: Laboratory Activity (B3); Physical Science (B1)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; Sustainable Course
ERTH 102 Physical Geology 3 Units GE
Prerequisite: High school chemistry or physics is recommended; students with no previous science courses are advised to enroll in ERTH 101. No college credit for those who have passed ERTH 101.
Typically Offered: Fall and spring
Physical and chemical processes in the earth, including origin and identification of rocks and minerals; earth’s interior; movements and major features of the earth’s crust; erosion and sedimentation; geological structures; topographic maps; mineral resources. 3 hours laboratory, 2 hours lecture. (004069)
General Education: Laboratory Activity (B3); Physical Science (B1)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; Sustainable Course

ERTH 104 Inquiry into the Science of Climate Change 3 Units GE
Typically Offered: Fall and spring
An experiential course that develops skills in critical thinking through inquiry into and analysis of arguments about climate change science (e.g. greenhouse effect, fossil fuels, evidence for human-caused global warming, predictions of our climate future, climate change solutions, etc.). 3 hours lecture. (021130)
General Education: Critical Thinking (A3)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

ERTH 110 Oceanography 3 Units GE
Typically Offered: Fall and spring
Introduction to the ocean environment with a special emphasis on exploring the interactions between the geological, physical, chemical and biological processes. Topics include how ocean basins developed and changed over geological time scales and how the properties of seawater are linked and provide the foundation for marine life, motion, and climate. 2 hours activity, 2 hours lecture. (021716)
General Education: Laboratory Activity (B3); Physical Science (B1)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

ERTH 130 Introduction to Environmental Science 3 Units GE
Typically Offered: Fall and spring
An introduction to human impact upon planet Earth. Scientific principles applied to air pollution, water pollution, and solid and radioactive waste problems. Population dynamics, world hunger, and environmental issue analysis are also covered. 2 hours activity, 2 hours lecture. (004131)
General Education: Laboratory Activity (B3); Physical Science (B1)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; Sustainable Course

ERTH 165 Principles of Environmental Science 2 Units
Typically Offered: Fall only
An introduction to environmental science as an integrative field of study and its parent disciplines. Field and laboratory techniques are introduced through examination of case studies. Students learn about the various professions engaged in environmental and resource management. 3 hours laboratory, 1 hour lecture. (020687)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Lower Division; Sustainable Course

ERTH 170 Atmospheric Science 3 Units
Typically Offered: Spring only
Composition and mean vertical structure of the atmosphere, energy and warming and cooling of the atmosphere and the surface, atmospheric water vapor, cloud types, static stability, the formation of clouds, precipitation, air pressure, and wind. 3 hours lecture. (004130)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

ERTH 198 Special Topics 1-3 Units
Prerequisite: Department permission.
Typically Offered: Fall and spring
This course is for special topics. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours discussion. (004136)
Grade Basis: Graded
Repeatability: You may take this course more than once
Course Attributes: Lower Division

ERTH 199 Special Problems 1-3 Units
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
This course is an independent study of special problems. 9 hours supervision. (020352)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Lower Division

ERTH 203 Evolution of the Earth 3 Units
Typically Offered: Fall only odd years
Study of the Earth as an evolving planet from its nebular origin through plate tectonics and the spread of life forms. 3 hours laboratory, 2 hours lecture. (004070)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

ERTH 265 Soils and Surficial Processes 3 Units
Prerequisite: CHEM 111 (may be taken concurrently); ERTH 101, ERTH 102, ERTH 165 or SCED 343 (may be taken concurrently).
Typically Offered: Fall only
In-depth survey of the hydrologic cycle, and soil systems. Interactions between these systems are examined through case studies. 3 hours laboratory, 2 hours lecture. (020723)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; Sustainable Course

ERTH 289 Geoscience Internship 1-3 Units
Typically Offered: Fall and spring
This course is an internship. You must register directly with a supervising faculty member. 9 hours supervision. (021015)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Lower Division

ERTH 322  Mineral Resources  3 Units  
Prerequisite: ERTH 102 or equivalent.  
Typically Offered: Fall and spring  
Where do the B2 elements in our cell phones come from? Why do we see the scars of historical mining across the landscape of northern California? What is acid mine drainage and how can we prevent or treat it? These questions and more are addressed in this course, which explores the mineral resources available on Earth, and the environmental impacts associated with their extraction and use. There are positive and negative aspects to the extraction and use of each resource, and we strive to consider the economic, societal, and political aspects of these topics in addition to the environmental aspects in order to gain a more rounded perspective. 3 hours laboratory, 2 hours lecture.  (022042)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division

ERTH 325  Geology of California  3 Units  
Prerequisite: ERTH 101 or ERTH 102.  
Typically Offered: Spring only even years  
Geologic setting of California and historical development of its geologic provinces. The impact of earthquakes, volcanic activity, coastal erosion, and earth resources on California. Field trip required. 3 hours discussion.  (004085)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division

ERTH 330  Environmental Science  3 Units  
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Physical Sciences (B1); GE Life Sciences (B2); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.  
Typically Offered: Spring, summer, fall  
Human impact on life-support systems; use of physical and ecological principles in environmental management and protection; discussion of land use and its environmental impact; and an evaluation of human influence on natural cycles. 3 hours lecture.  (004141)  
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Sustainability and Climate Change Pathway  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course

ERTH 330W  Environmental Science (W)  3 Units  GE, W  
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Physical Sciences (B1); GE Life Sciences (B2); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.  
Typically Offered: Fall and spring  
Human impact on life-support systems; use of physical and ecological principles in environmental management and protection; discussion of land use and its environmental impact; and an evaluation of human influence on natural cycles. 3 hours lecture.  (021331)  
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Sustainability and Climate Change Pathway  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course; Writing Course

ERTH 340  Sustainability of Marine Environments: The Fate between People and the Sea  3 Units  
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.  
Typically Offered: Fall and spring  
In this course, students learn what is necessary to become good stewards of the ocean ecosystem. Discussions of stewardship focus on the importance of sustainable ocean management and explore how competing interests among countries impact international plans to use and manage ocean resources. In addition to this top-down approach of ocean management, this course also examines the role of individual responsibility for preservation of the ocean environment, as well as justice issues for marginalized communities who rely on the ocean. During these discussions, students also learn how the physio-chemical properties of seawater (i.e., temperature, density, salinity, sounds, light) are linked and provide the foundation for marine life, motion (i.e., currents, tides, waves, transportation), energy, and climate. 3 hours lecture.  (022295)  
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Sustainability and Climate Change Pathway  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course

ERTH 341  Teaching Practicum in Geological and Environmental Sciences  3 Units  
Prerequisite: ERTH 102 or SCED 342.  
Typically Offered: Inquire at department  
This course provides students with classroom experience that utilizes a variety of interactive, engaging teaching styles that develop and reinforce skills and concepts through open-ended activities such as direct instruction, discourse, demonstrations, individual and cooperative learning explorations, peer instruction, and student-centered discussion. 9 hours supervision.  (020329)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division

ERTH 342  Concepts in Earth and Space Science  3 Units  
Prerequisite: SCED 141, SCED 142, GE Physical Sciences (B1), or GE Life Sciences (B2). Open to Liberal Studies online students only.  
Typically Offered: Fall and spring  
This course is for future elementary/middle school teachers and designed to meet the Elementary Subject Matter Standards required by the California Commission on Teacher Credentialing. The overall goal is to provide a learning environment that fosters content knowledge and interest in teaching earth and space science and appreciation for the role that science plays in our everyday lives. 3 hours lecture.  (022004)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division
ERTH 352 Recovery of Altered Ecosystems 3 Units
Prerequisite: BIOL 350W (may be taken concurrently), ERTH 265 and ERTH 315 (may be taken concurrently).
Typically Offered: Spring only
This course provides students with an understanding of the role of stresses and disturbances in aquatic and terrestrial ecosystems and natural processes of recovery. Students are introduced to the practices used to modify, restore, and remediate ecosystems altered by human activities and develop a restoration program for a nearby, altered ecosystem that contains both land and water components. In addition, we discuss policy and regulations as they relate to specific projects. 3 hours laboratory, 2 hours lecture. (021925)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 353 Environmental Fluid Mechanics 3 Units
Prerequisite: MATH 109 or MATH 120; PHYS 202A or PHYS 204A.
Typically Offered: Fall only odd years
Fluids (gases and liquids) are ubiquitous and play central roles in shaping the environment and transporting heat, momentum, pollutants, and constituents that support life and control climate. This course provides students with an introduction to fundamental concepts in fluid mechanics and an illumination of the vital and fascinating, and often non-intuitive, world of fluid phenomena. 3 hours lecture. (022002)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 355 Natural Disasters 3 Units GE
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Physical Sciences (B1); GE Life Sciences (B2); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.
Typically Offered: Fall and spring
The purpose of this course is to provide students with the material and opportunity to learn the science behind geological and natural disasters and gain an appreciation of how these events shape both our lives and the development of societies with specific reference to California. The course focuses on, but not be limited to, a discussion of how much of a disaster is a natural phenomenon and how much a tragedy is imposed by the designs of populations. Along the way, we develop the methodology of science and build writing and quantitative skills. 3 hours lecture. (004148)
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); California Studies Pathway; Sustainability and Climate Change Pathway
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 360 Field Methods 2 Units
Prerequisite: ERTH 306, ERTH 307 with a grade of C- or higher.
Typically Offered: Spring only
Elementary geologic field methods, descriptive geometry, photogeology, and geologic mapping. Ten days in the field during January intersession. 6 hours laboratory. (004074)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Upper Division

ERTH 361W Preparation of the Geological Report (W) 1 Unit W, GW
Prerequisite: GE Written Communication (A2) requirement.
Corequisites: ERTH 360.
Typically Offered: Spring only
This course is a continuation of the writing experience that is initiated in ERTH 360. It deconstructs scientific writing through a re-writing of the ERTH 360 field report and analysis of other examples of geologic articles. 1 hour lecture. (004075)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 1 unit
Course Attributes: Upper Division; Writing Course; Graduation Writing Assessment

ERTH 370W Energy in the Human Environment (W) 3 Units W, GW
Prerequisite: GE Written Communication (A2) requirement; ERTH 170 (may be taken concurrently) or ERTH 306; and PHYS 202A or PHYS 204A (may be taken concurrently).
Typically Offered: Fall only
Analysis of present and long-term global energy crises; coverage of scientific concepts needed to understand energy and its environmental interactions; in-depth examination of alternative energy sources and their environmental impact. 3 hours lecture. (004149)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course; Writing Course; Graduation Writing Assessment

ERTH 375 Geology of Food and Health 3 Units GE
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.
Typically Offered: Fall only
Focuses on the relation between natural geological factors, food production, and health problems in humans and animals on a global scale, and explores the impacts of diverse proposed solutions on population health and public policy. 3 hours lecture. (021128)
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Agriculture, Food, and Environment Pathway
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 380 Hydrology 3 Units
Prerequisite: PHYS 202A or PHYS 204A (may be taken concurrently).
Typically Offered: Fall only
A survey of the mass transfer processes and storage elements within the hydrologic cycle: precipitation, interception, surface runoff, infiltration, evapo-transpiration, soil water and groundwater. Quantitative methods for estimating flow and storage, use of probability concepts to predict extreme hydrologic events in a time series. 3 hours laboratory, 2 hours lecture. (004150)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course

ERTH 430  Wetland Ecology and Management  3 Units
Prerequisite: Upper division standing in BS Environmental Science, BA Biological Sciences, BS Biological Sciences, BS Microbiology, BA Geography, or BS Agriculture. Highly recommended: BIOL 161 and/or BIOL 350W.
Typically Offered: Fall only even years
This course examines the ecology, management, and restoration of wetland ecosystems, including biotic and abiotic processes, functions, wildlife and policy discussions. We place emphasis on biological, physical, chemical, and ecological aspects of major wetland ecosystems found in North America. We also discuss ecosystem services, wetland classification/delineation, legal protection of wetlands, and the relationship between wetlands and climate change. 3 hours laboratory, 2 hours lecture. (022003)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 435  Boundary Layer Meteorology  3 Units
Prerequisite: MATH 109 or MATH 120; PHYS 202A or PHYS 204A.
Typically Offered: Spring only
The atmospheric boundary layer (ABL) is the lowest part of the Earth's atmosphere that is in constant contact with the surface of the Earth and responds quickly to the thermal and mechanical forcings. The ABL has a very strong role in the vertical fluxes of heat, momentum, and trace gases. Turbulence is the main physical process by which those fluxes occur and hence statistical descriptions are the norm. Therefore, this course focuses on small scale meteorology (also known as micrometeorology), turbulence, and the behavior of the atmosphere near the surface. 3 hours lecture. (022043)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 436  Volcanology  3 Units
Prerequisite: ERTH 101 or ERTH 102, ERTH 306, or faculty permission.
Typically Offered: Spring only odd years
An introduction to physical processes associated with terrestrial and extraterrestrial volcanoes and their products. Specific topics include volcano monitoring, rheologic properties of magma and volcanic flows, experimental volcanology, theoretical and analog flow modeling, as well as in-depth examination of local volcanoes and various eruptions (past, present, and future). This course includes an extended (4-5 days) field trip, required for all students. Students participate in the field by collecting data for future course projects, presenting prepared information at various field trip stops, or both. Students also complete research projects throughout the semester. 3 hours lecture. (020293)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 440  Environmental Sensing  3 Units
Prerequisite: PHYS 202B, PHYS 204B, or PHYS 204C (may be taken concurrently).
Typically Offered: Fall only
Instruments are critical to making quantitative observations, and observations are critical to the scientific method. The subject of environmental instrumentation is vast and constantly changing as new technologies emerge. Through a combination of lectures and hands-on projects, students are (1) introduced to the process of assembling and characterizing an electronic instrument of their own, (2) forming a hypothesis and testing it by collecting data, and (3) writing reports and giving presentations on their results. 3 hours laboratory, 2 hours lecture. (020639)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 445  Sedimentary Basin Analysis  3 Units
Prerequisite: ERTH 307, ERTH 403 (may be taken concurrently) both with a grade of C- or higher.
Typically Offered: Spring only even years
Study of the paleographic evolution of sedimentary basins. Includes stratigraphic and paleontologic correlation, facies analysis, sedimentary petrology, depositional systems, and the tectonic framework of sedimentary basins. 3 hours laboratory, 2 hours lecture. (004114)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ERTH 450  Water Resources Management  3 Units
Prerequisite: ERTH 380 (may be taken concurrently).
Typically Offered: Spring only even years
Water-resources, management plans of world; emphasis on California and Israeli plans. Water plans in primitive, agrarian, and industrial societies. Data gathering and interpretation, regulation of water resources, and control of water pollution. 3 hours lecture. (004168)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course

ERTH 470  Renewable Energy  3 Units
Prerequisite: ERTH 370W.
Typically Offered: Fall only odd years
Teach students about the wide range of renewable energy technologies that are available, how they harvest energy from the environment, how they impact the environment, and their varying degrees of competitiveness with fossil fuels. Major forms of renewable energy covered include solar thermal, solar photovoltaics, bioenergy, hydroelectricity, tidal power, wind energy, wave energy, and geothermal energy. Students also gain experience reading, researching, and presenting findings. 3 hours lecture. (021766)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

</table>
ERTH 565  Geochemistry  3 Units  
**Prerequisite:** CHEM 111, ERTH 102. Recommended: ERTH 306.  
**Typically Offered:** Fall only even years  
Investigation of the chemistry of minerals, rocks, and natural waters. Provides students with interests in geology, hydrology, environmental science, and other disciplines a background on the chemical compositions of rocks, minerals, and natural waters; chemical processes in the formation of rocks and waters; principles of reaction chemistry, thermodynamics, and kinetics applied to geochemical systems; and migration of chemical contaminants in the environment. 3 hours lecture.  (004115)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division  

ERTH 572W Advanced Field Geology (W)  3 Units  W, GW  
**Prerequisite:** GE Written Communication (A2) requirement; ERTH 403 with a grade of C- or higher.  
**Corequisites:** ERTH 471 (winter field - grade of C- or higher).  
**Typically Offered:** Spring only  
Independent geologic mapping of a difficult area. Report required. Field work on weekends or during spring recess, totaling at least 10 days. 6 hours laboratory.  (004107)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Writing Course; Graduation Writing Assessment  

ERTH 580 Geological Evolution of North America  3 Units  
**Prerequisite:** ERTH 408, ERTH 455 (with grade of C- or higher for both).  
**Typically Offered:** Spring only  
Group study of topics related to the geological evolution of North America. Student presentations and group discussion will focus on common themes or geologic regions. 3 hours lecture.  (004170)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division  

ERTH 598 Special Topics  1-4 Units  
**Prerequisite:** Department permission.  
**Typically Offered:** Fall and spring  
This course is for special topics. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours discussion.  (020063)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course more than once  
**Course Attributes:** Upper Division  

ERTH 599 Special Problems  1-3 Units  
**Prerequisite:** Faculty permission.  
**Typically Offered:** Fall and spring  
This course is an independent study of special problems. You must register directly with a supervising faculty member. 3 hours supervision.  (021283)  
**Grade Basis:** Credit/No Credit  
**Repeatability:** You may take this course for a maximum of 6 units  
**Course Attributes:** Upper Division  

ERTH 600 Graduate Seminar I  1 Unit  
**Typically Offered:** Fall only  
This course is the first of a series of writing courses specifically for students in the M.S. Geosciences or Environmental Science programs. The goal of the course is to introduce students to the M.S. program, and aid them in putting together the preliminary literature review for their thesis research. This course introduces the principles of excellent academic writing for scientists while also utilizing peer support to improve communication. 1 hour seminar.  (004177)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 1 unit  
**Course Attributes:** Graduate Division  

ERTH 601 Graduate Seminar II  1 Unit  
**Typically Offered:** Spring only  
This course is the second of a series of writing courses specifically for students in the M.S. Geosciences or Environmental Science programs. The goal of the course is to support students through writing their research proposal. Emphasis placed on students completing an approved written thesis proposal, and giving a public oral presentation of their proposal by the end of the course. 1 hour seminar.  (004178)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 1 unit  
**Course Attributes:** Graduate Division  

ERTH 602 Graduate Seminar III  1 Unit  
**Prerequisite:** ERTH 600, ERTH 601.  
**Typically Offered:** Fall only  
This course is the third of a series of writing courses specifically for students in the M.S. Geosciences or Environmental Science programs. The goal of the course is to build on the previous courses while focusing on the thesis or project itself. This course provides a forum for intensive analysis of the principles of excellent academic writing for scientists while also utilizing peer support to improve communication. 1 hour seminar.  (022020)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 1 unit  
**Course Attributes:** Graduate Division  

ERTH 603 Graduate Seminar IV  1 Unit  
**Prerequisite:** ERTH 600, ERTH 601.  
**Typically Offered:** Spring only  
This course is the fourth of a series of writing courses specifically for students in the M.S. Geosciences or Environmental Science programs. The goal of the course is to build on the previous courses while focusing on the thesis or project itself. Emphasis placed on students completing an approved written thesis proposal, and giving a public oral presentation of their proposal by the end of the course. 1 hour seminar.  (022021)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 1 unit  
**Course Attributes:** Graduate Division  

ERTH 604 Graduate Seminar V  1 Unit  
**Prerequisite:** ERTH 600, ERTH 601.  
**Typically Offered:** Fall only  
This course is the fifth of a series of writing courses specifically for students in the M.S. Geosciences or Environmental Science programs. The goal of the course is to build on the previous courses while focusing on the thesis or project itself. Emphasis placed on students completing an approved written thesis proposal, and giving a public oral presentation of their proposal by the end of the course. 1 hour seminar.  (022022)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 1 unit  
**Course Attributes:** Graduate Division  

ERTH 606 Teaching Assistant Preparation  2 Units  
**Prerequisite:** Graduate status.  
**Typically Offered:** Fall only  
This is a seminar course for teaching assistants focusing on the theory and practice of active learning in science laboratory settings. The overall goals of the course; 1) To increase participants understanding of strategies to engage students in active learning, 2) to provide opportunities for modeling best practices in science teaching and 3) confidence in his/her ability as effective science lab instructors. 2 hours seminar.  (021000)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 2 units  
**Course Attributes:** Graduate Division  

ERTH 616 Natural Water Systems  3 Units  
**Prerequisite:** CHEM 111, ERTH 315. Recommended: CHEM 112.  
**Typically Offered:** Fall only odd years  
Fundamentals of processes in environmental aquatic systems emphasizing acid-base and pH relationships, solubility of carbon species in natural waters, and interactions at the solid-liquid interface. Students in this course interpret these processes in light of new ideas, problems, and materials. 3 hours lecture.  (020287)  
**Grade Basis:** Graduate Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Graduate Division; Sustainable Course
ERTH 617 Advanced Topics in Geology
3 Units
Typically Offered: Fall and spring
You must register directly with a supervising faculty member. Discussions and library research into selected topics; may include some lab work. Different topics presented each semester. May be repeated for credit, with permission of instructor. 9 hours supervision. (004180)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 9 units
Course Attributes: Graduate Division

ERTH 619 Advanced Topics in Atmospheric Science
3 Units
Typically Offered: Fall and spring
You must register directly with a supervising faculty member. Discussions and library research into selected topics; may include some lab work. Different topics presented each semester. May be repeated for credit, with permission of instructor. 9 hours supervision. (004181)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 9 units
Course Attributes: Graduate Division

ERTH 621 Advanced Topics in Hydrology
3 Units
Typically Offered: Fall and spring
You must register directly with a supervising faculty member. Discussions and library research into selected topics; may include some lab work. Different topics presented each semester. May be repeated for credit, with permission of instructor. 9 hours supervision. (004182)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 9 units
Course Attributes: Graduate Division

ERTH 625 Advanced Topics in Environmental Science
3 Units
Typically Offered: Fall and spring
You must register directly with a supervising faculty member. Discussions and library research into selected topics; may include some lab work. Different topics presented each semester. May be repeated for credit, with permission of instructor. 9 hours supervision. (004184)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 9 units
Course Attributes: Graduate Division

ERTH 630 Geotectonic Development of California
3 Units
Prerequisite: Graduate standing or consent of instructor.
Typically Offered: Spring only
Geological and geophysical characteristics of the geomorphic provinces of California. Formation of surficial features, such as mountain ranges, drainage networks, and valleys as a response to active tectonic processes. Detailed geologic and physiographic framework of Northern California as a setting for field-based studies in the geosciences. 3 hours lecture. (004185)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 640 Hydrogeochemistry
3 Units
Prerequisite: CHEM 111, CHEM 112. Recommended: ERTH 565 or ERTH 616.
Typically Offered: Spring only
Origins and sources of chemical constituents of natural waters, including water-rock interactions, equilibrium aqueous speciation, reaction-path modeling, oxidation-reduction reactions, mineral solubility relations, geochemical transport, reaction kinetics, and aqueous isotopic systems. 3 hours seminar. (004186)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 645 Applied Geophysics
3 Units
Prerequisite: One year of physics, ERTH 102, or faculty permission.
Typically Offered: Spring only even years
Introduction to solid-earth geophysical exploration techniques and data analysis. Includes electrical, electromagnetic, gravimetric, and seismic surveying, and wireline well logging. Concentration on problems in environmental science, hydrology, mineral prospecting, and oil exploration. Students apply these techniques to solve real-world problems. 3 hours discussion. (004112)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 649 Economic Geology
3 Units
Prerequisite: ERTH 306, ERTH 307, or faculty permission.
Typically Offered: Fall only odd years
The integrative course dealing with origins and occurrences of metallic and non-metallic mineral deposits, including factors in their use. 3 hours discussion. (004111)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 650 Environmental Monitoring
2 Units
Typically Offered: Fall only
Survey of environmental monitoring for air quality, water quality, pollution, waste disposal, environmental resources, etc., including field and laboratory observations and exercises. An individual term project in environmental monitoring is required and may involve collection of field data, interpretation of field data, development of analytical capabilities, or other subjects pertinent to the student's research interests. 1 hour discussion, 3 hours laboratory. (004187)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Graduate Division; Sustainable Course

ERTH 652 Science and Environmental Regulations
3 Units
Prerequisite: CHEM 270 or CHEM 320, MATH 120, PHYS 202B. Recommended: BIOL 350W or BIOL 360.
Typically Offered: Fall only
Examination of the scientific basis of environmental regulations, case studies. 3 hours lecture. (020466)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division
ERTH 654 Environmental Risk Assessment 3 Units
Prerequisite: CHEM 270 or CHEM 320, MATH 120, PHYS 202B.
Recommended: BIOL 350W or BIOL 360.
Typically Offered: Spring only
The scientific basis of risk assessment in various sectors of human activity, with particular emphasis on business, industrial, governmental agency, and planning concerns. 3 hours lecture. (020467)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 655 Fossil Fuels 3 Units
Prerequisite: ERTH 307 or faculty permission.
Typically Offered: Fall only even years
Geological principles and environmental impacts of exploring for and exploiting resources of petroleum, natural gas, oil shales, oil sands, coal, and coalbed-methane. Applications using geological data, potential sites for CO2 sequestration and environmental impact assessments are emphasized. This course involves the application of theory to new ideas, problems, and materials. 3 hours lecture. (020574)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 656 Environmental Sciences Capstone 3 Units
Prerequisite: Completion of three semesters of coursework in either the Environmental Sciences MS program or the proposed PSM option of the Environmental Sciences MS program.
Typically Offered: Spring only
Overview of environmental science issues, including biological, chemical, and engineering examples. Particular focus is on future issues and approaches. Social and ethical issues are also examined. 9 hours supervision. (020465)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 660 Numerical Analysis 3 Units
Prerequisite: MATH 120.
Typically Offered: Fall only
Survey and implementation of common numerical techniques in use in geoscientific data analysis, including multivariate data analysis, geostatistics, finite difference and finite element analyses, time-series analysis, and fractal geometry. 3 hours lecture. (004188)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

ERTH 670 Environmental and Engineering Geology 3 Units
Prerequisite: ERTH 102, ERTH 203, ERTH 306. For majors in related sciences and technical fields, ERTH 102 only.
Typically Offered: Fall only odd years
Practical application of techniques to solve geological engineering and environmental problems. Techniques of surface investigations and remote sensing; borehole and surface geophysics; soil descriptions and properties; landslide mapping, mechanics and remediation, subsurface investigation of rock masses; mapping of discontinuities, establishing rock quality, tunneling techniques. Seismic studies; surface and trench mapping of faults, seismic risk analysis. Ground water monitoring, site assessment, techniques of hazardous waste cleanup, state and federal regulations on hazardous waste, siting of landfills. Students in this course apply these theories to new ideas. 3 hours lecture. (004116)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division; Sustainable Course

ERTH 697 Independent Study 1-4 Units
Typically Offered: Fall and spring
This course is a graduate-level independent study. You must register directly with a supervising faculty member. 0 hours supervision. (004189)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Graduate Division

ERTH 699P Master's Project 1-6 Units
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
This course is a master's project. You must register directly with a supervising faculty member. 9 hours supervision. (020469)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

ERTH 699T Master's Thesis 1-6 Units
Typically Offered: Fall and spring
This course is a master's thesis. You must register directly with a supervising faculty member. 3 hours supervision. (004194)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division
