Mathematicians can work with engineers, physicists, and biologists in

Both theoretical research programs or developing the next cool piece of
technology. Good knowledge of computer programming strengthens both
degrees.

symbols-terms/) for an explanation of course description terminology
and symbols, the course numbering system, and course credit units.

Experience
The Math Club serves as a social vehicle for some of our majors. This
group organizes social events such as bowling, softball, and recreational
math talks. Attending undergraduate math conferences and supporting
Putnam exam participants are just some of the things Math Club has
sponsored.

Students in the mathematics education option can participate in Project
Math, designed to build a community of future teachers. An on-campus
dormitory exclusively for math and science majors is another community-
building opportunity.

Outlook
Job prospects are very good for any option you choose.

Statistician and data scientist are usually in the top 10 of any best jobs
list (https://money.usnews.com/careers/best-jobs/rankings/the-100-
best-jobs/), and the demand keeps growing as big tech companies and
pharmaceutical and manufacturing companies all need statisticians and
data analysts. Statisticians collect data, analyze and interpret the data,
and write conclusions. Add a minor in computer science, and you have a
very marketable skillset.

California (and many other states) has a chronic need for qualified
high school math teachers, so graduates can find work in nearly any
location. If you enjoy working with teenagers and helping them grow into
responsible, productive adults, this can be a very rewarding job. One of
the perks of a high school teacher is long summer vacations!

Both general and applied mathematics degrees get you into the door
of many industries and government jobs. Knowledge of number theory
can be applied to security systems; mathematical models can be used
to predict trends—for example, how a pandemic can spread. Applied
mathematicians can work with engineers, physicists, and biologists in

Mathematics
- In certain courses, at the discretion of the instructor, you may be
required to buy a computer program and/or graphing calculator.
- Completion of the Entry-Level Mathematics (ELM) requirement is a
prerequisite for registration in all MATH courses.
- Enrollment in any mathematics course requires a grade of C- or higher
in all prerequisite courses or their transfer equivalents.

MATH 101 Patterns of Mathematical Thought 3 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
An informal approach to mathematics designed to bring an appreciation and workable knowledge of the subject to non-majors. Not acceptable for a mathematics major or minor. 1 hour discussion, 2 hours lecture. (005514)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 105 Introduction to Statistics 3 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
Summary of numerical data, distributions, linear regression, and introduction to statistical inference. Statistical software is used. 1.5 hours discussion, 1.5 hours lecture. (005501)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 107 Finite Mathematics for Business 3 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
Solutions to systems of linear equations, matrices, linear programming, combinatorics, probability, binomial and normal distributions. 1.5 hours discussion, 1.5 hours lecture. (005521)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 108 Statistics of Business and Economics 3 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
Descriptive statistics, sampling theory, statistical inference and tests of hypotheses, analysis of variance, chi-square tests, simple regression and correlation, and multiple regression and correlation. 1.5 hours discussion, 1.5 hours lecture. (001042)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 109 Survey of Calculus 4 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready; MATH 118 and MATH 119 (or equivalent) with a C- or higher, or a qualifying score on the department administered calculus readiness assessment in addition to high school trigonometry and precalculus with a C- or higher.
Typically Offered: Fall and spring
This course covers the fundamental concepts and techniques of differential and integral calculus with an introduction to differential equations. Emphasis on applications from the Life Sciences. This course is not intended for majors in mathematics, physics, chemistry, or engineering. No credit for students with credit in MATH 120. A score that meets department guidelines on a department administered calculus readiness exam must be achieved by those who claim high school equivalence. 4 hours discussion. (005512)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 109X Survey of Calculus Problem Solving Session 1 Unit
Corequisites: MATH 109.
Typically Offered: Fall and spring
This is a 1-unit supplement to Survey of Calculus, MATH 109. This is structured as a workshop designed to complement MATH 109 students with broader and deeper applications of calculus, providing students with opportunities for additional problem-solving and skill-building in a student-centered collaborative environment. 3 hours independent study. (021280)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Lower Division

MATH 110 Concepts and Structures of Mathematics 3 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
Structure of the real number system, operations on real numbers, number theory. Not acceptable for a mathematics major or minor. 3 hours discussion. (005522)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 116 College Algebra 4 Units GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
This course covers advanced algebra concepts beyond the scope of Intermediate Algebra. The topics include algebraic simplifying, conics, theory and solution of equations and inequalities, systems of equations, linear functions, exponential and logarithmic functions, polynomial and rational functions, binomial expansion, and partial fractions. 4 hours lecture. (021954)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 117 Hands-On Lab, Mathematics 2 Units
Prerequisite: MATH 110.
Corequisites: MATH 210 or faculty permission.
Typically Offered: Fall and spring
The Hands-On Lab for Mathematics provides a rich, sustained, and guided teaching experience for undergraduate students preparing to be elementary or middle school teachers. By developing, refining, and repeatedly teaching a lesson aligned to California mathematics standards, prospective teachers gain insights into the complexities of teaching mathematics content. In addition, prospective teachers engage in Lesson Study with the teachers for these children, thus acquiring experience in a collegial relationship with practicing professionals. 2 hours seminar. (020430)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division
MATH 118  Trigonometry  3 Units  GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
Trigonometric functions, graphs, identities and conditional equations, logarithms, solutions of triangles, and complex numbers. 3 hours discussion. (005500)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 119  Precalculus Mathematics  4 Units  GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready, and either 1/2 year of high school trigonometry or MATH 118 (may be taken concurrently).
Typically Offered: Fall and spring
Functions and graphs, including polynomial, rational, exponential, logarithmic, and trigonometric functions. Systems of equations and inequalities, polar and parametric equations, complex numbers, and analytic trigonometry. 4 hours discussion. (005504)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 119X  Precalculus Problem Session  1 Unit
Prerequisite: Faculty permission.
Corequisites: MATH 119.
Typically Offered: Fall and spring
Designed to supplement MATH 119 with additional applications. Provides the student with the opportunity for additional assistance in developing problem-solving abilities. 3 hours independent study. (005505)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 120  Analytic Geometry and Calculus  4 Units  GE
Prerequisite: GE Mathematics/Quantitative Reasoning Ready; MATH 118 and MATH 119 (or equivalent) with a C- or higher, or a qualifying score on the department administered calculus readiness assessment in addition to high school trigonometry and precalculus with a C- or higher.
Typically Offered: Fall and spring
Limits and continuity. The derivative and applications to related rates, maxima and minima, and curve sketching. Transcendental functions. An introduction to the definite integral and area. 4 hours discussion. (005506)
General Education: Quantitative Reasoning (B4)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 120X  Calculus Problem Session  1 Unit
Prerequisite: Faculty permission.
Corequisites: MATH 120.
Typically Offered: Fall and spring
Designed to supplement MATH 120 with additional applications of introductory calculus. Provides the student with the opportunity for additional assistance in developing problem-solving abilities. 3 hours independent study. (005510)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 121  Analytic Geometry and Calculus  4 Units  GE
Prerequisite: MATH 120.
Typically Offered: Fall and spring
The definite integral and applications to area, volume, work, differential equations, etc. Sequences and series, vectors and analytic geometry in 2 and 3-space, polar coordinates, and parametric equations. 4 hours discussion. (005507)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 121X  Calculus Problem Session  1 Unit
Prerequisite: Concurrent enrollment in MATH 121, faculty permission.
Typically Offered: Fall and spring
Designed to supplement MATH 121 with additional applications and expanded explanations of concepts encountered in second-semester calculus. Provides the student with the opportunity for additional assistance in coming to an understanding of the concepts of calculus. 3 hours independent study. (005511)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 125  Advanced Number and Operation  3 Units
Prerequisite: Successful completion of high school precalculus, concurrent enrollment in MATH 118 or 119, or faculty permission.
Typically Offered: Fall only
Investigate number and operation through calculation and abstraction, find patterns and relationships through computation, develop and test mathematical conjectures, and develop an appreciation of proof and an ability to make mathematical arguments. Basic concepts from Number Theory are explored, culminating in proof of the Fundamental Theorem of Arithmetic and related theorems in other number sets. 3 hours discussion. (021846)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 130  Introduction to R  1 Unit
Typically Offered: Fall and spring
This accelerated short-course is designed as a primer to get the complete novice up and running with the basic knowledge of how to use the statistical programming language R. Target audience is anyone who wants to become the boss of their own data and conduct their own analysis. We cover how to get data into R, how to manipulate it into analyzable format, and how to create informative plots. Emphasis is placed on reproducibility and literate programming. The course culminates with a data exploration project. This course requires the use of a laptop computer and appropriate software. Typically offered as 3 hour discussion for 5 weeks. 1 hour discussion. (021774)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Lower Division; Laptop required

**Course Attributes:**
- Repeatability: You may take this course for a maximum of 3 units
- Course Attributes: Lower Division
MATH 230  An Introduction to Computational Mathematics  3 Units
Prerequisite: MATH 121, no previous computer experience required.
Typically Offered: Fall only
An introduction to the use of mathematical computer software. This course provides an introduction to a programming environment, preparing math majors to use computers to explore and solve varied math problems. The software used in this class depends on the instructor and may be chosen from Mathematica, GP/PARI, GAP, SAS, R, etc. This course satisfies the computer literacy requirement for mathematics majors. 3 hours discussion. (005526)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 9 units
Course Attributes: Lower Division

MATH 235  Elementary Linear Algebra  3 Units
Prerequisite: MATH 121.
Typically Offered: Fall and spring
Matrices, determinants, cartesian n-space (basis and dimension of a subspace, rank, change of basis), linear transformations, eigenvalues. Numerical problems will be emphasized. 3 hours discussion. (005553)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 241  Secondary Math Early Field Experience  1 Unit
Typically Offered: Fall and spring
This seminar and the associated CAVE field experience give prospective teachers early exposure to issues relevant to the profession of teaching secondary mathematics. In particular, the experience helps these future teachers develop a deeper understanding of the K-12 mathematics curriculum, understand connections between their university subject matter preparation and K-12 academic content, and reflect on developmental and social factors that affect K-12 students’ learning of mathematics. 1 hour seminar. (020432)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 260  Elementary Differential Equations  4 Units
Prerequisite: MATH 121.
Typically Offered: Fall and spring
First order separable, linear, and exact equations; second order linear equations, Laplace transforms, series solutions at an ordinary point, systems of first order linear equations, and applications. 4 hours discussion. (005509)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Lower Division

MATH 250X  Elementary Differential Equations Problem Session  1 Unit
Corequisites: MATH 260.
Typically Offered: Fall and spring
Designed to supplement MATH 260 with broader and deeper applications of differential equations, providing the student with opportunities for additional problem-solving skills. A minimum of 20 hours of activity are required to earn credit for the class; forty hours are available. 3 hours independent study. (020315)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

MATH 290  Mathematics and Statistics Tutoring  1 Unit
Corequisites: Concurrent enrollment in a course offered through the Dept of Mathematics Statistics at CSU, Chico.
Typically Offered: Fall and spring
This course provides supplemental mathematics statistics tutoring. 3 hours independent study. (020823)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 8 units
Course Attributes: Lower Division

MATH 295  Project M.A.T.H. Seminar Year 2  1 Unit
Prerequisite: MATH 195.
Typically Offered: Fall and spring
The Project M.A.T.H. Seminar - Year 2 is the continuation of a biweekly seminar for students in Project M.A.T.H., an innovative program for students interested in becoming secondary mathematics teachers. Students work with mentor teachers, prepare and present lessons, and participate in a structured early field experience. They also take on a leadership role in the seminar. Completion of the seminar series satisfies the Credential Program's Early Field Experience requirement. 1 hour seminar. (020433)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Lower Division

MATH 298  Special Topics  1-3 Units
Typically Offered: Inquire at department
This course is for special topics offered for 1.0 - 3.0 units. Typically the topic is offered on a one-time-only basis and may vary from semester to semester and be different for different sections. See the class schedule for the specific topic being offered. 0 hours supervision. (021615)
Grade Basis: Graded
Repeatability: You may take this course more than once
Course Attributes: Lower Division

MATH 299  Special Problems  1-3 Units
Prerequisite: Faculty permission.
Typically Offered: Inquire at department
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 0 hours supervision. (021629)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Lower Division

MATH 300  Undergraduate Mathematics Seminar  2 Units
Prerequisite: GE Mathematics/Quantitative Reasoning Ready.
Typically Offered: Fall and spring
This course is designed to expose you to mathematics not normally covered in your regular curriculum. Guest speakers are drawn from the ranks of our faculty, including other disciplines, our students, and industry. Talks are interactive, participatory, and fun. There is no prerequisite, except an interest in interesting mathematics. Topics typically include selections from number theory, math education, statistics, problem solving, undergraduate research, calculus, differential equations, spatial and planar geometry, probability, computer applications, mathematical operations, modeling, topology, trigonometry, metric measurements, elliptical curves, and bubbles, among others. This exposure broadens your horizons and expands your curiosity in hopes that you will explore mathematics beyond your required courses. 2 hours lecture. (021647)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 8 units
Course Attributes: Upper Division
MATH 305  Conceptual and Practical Statistics  
**Prerequisite:** MATH 120 or MATH 109 (may be taken concurrently).  
**Typically Offered:** Spring only  
Design of statistical experiments, graphing, sampling techniques, probability, and common probability distributions will be discussed, with an emphasis on practical applications. Uses and misuses of statistics, misrepresentation of data, and proper and improper statistical analyses will be discussed. 3 hours discussion. (005532)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

MATH 310  Patterns and Structures in Mathematics  
**Prerequisite:** MATH 110; MATH 210 or MATH 225.  
**Typically Offered:** Fall and spring  
Builds upon student's understanding of numbers and operations to develop their algebraic and proportional reasoning. Probability viewed as an application of proportional reasoning. Foundational statistics is also covered. Overall focus on developing a deep understanding of mathematics that is relevant to the teaching of Kindergarten-8th grade. Not acceptable for a mathematics major or minor except the Foundational Math Education option and Math Education minor. 3 hours discussion. (005542)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

MATH 311  Intuitive Foundations of Geometry  
**Prerequisite:** MATH 110, MATH 210; or MATH 225.  
**Typically Offered:** Fall and spring  
An intuitive approach to problem-solving in Euclidean, coordinate, motion, and space geometry. Concrete models are used for analyzing abstract ideas. Not acceptable for a mathematics major or minor other than the Math Education minor. 3 hours discussion. (005543)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

MATH 314  Probability and Statistics for Science and Technology  
**Prerequisite:** MATH 121; and one of the following: CSCI 111, MATH 130 (may be taken concurrently), MATH 230 or MECH 208.  
**Typically Offered:** Fall and spring  
Basic concepts of probability and statistics with emphasis on models used in science and technology. Probability models for statistical estimation and hypothesis testing. Confidence limits. One- and two-sample inference, simple regression, one- and two-way analysis of variance. Credit cannot be received for both MATH 314 and MATH 315. 4 hours discussion. (005533)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 4 units 
*Course Attributes:* Upper Division; Laptop required

MATH 315  Applied Statistical Methods I  
**Prerequisite:** MATH 105, MATH 109, or MATH 120, or faculty permission.  
**Typically Offered:** Fall and spring  
Single and two sample inference, analysis of variance, multiple regression, analysis of co-variance, experimental design, repeated measures, nonparametric procedures, and categorical data analysis. Examples are drawn from biology and related disciplines. The statistical programming language R is used. Appropriate for biology, agriculture, nutrition, psychology, social science and other majors. 3 hours discussion. (005568)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

MATH 317  Cryptography  
**Prerequisite:** CSCI 111; MATH 217 or MATH 330W.  
**Typically Offered:** Spring only  
This is the first course in cryptography with an emphasis on public key cryptosystems, digital signature schemes, and the underlying mathematical principles on which they are based. Students implement algorithms and solve problems in programming-based assignments. Some time is devoted to getting familiar with the Python programming language and the SageMath Software system. 4 hours discussion. (022044)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 4 units 
*Course Attributes:* Upper Division

MATH 330W  Methods of Proof (W)  
**Prerequisite:** GE Written Communication (A2) requirement and MATH 121.  
**Typically Offered:** Fall and spring  
A survey of elementary principles of logic, emphasizing the nature of proof. Standard methods of proof will be illustrated with examples from various branches of mathematics, including set theory and the theory of functions and relations. Other possible sources of examples include the calculus, number theory, theory of equations, topology of the real line. 3 hours seminar. (005530)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division; Writing Course

MATH 333  History of Mathematics  
**Prerequisite:** MATH 121; MATH 220 or MATH 225; and at least one upper division mathematics course. Recommended: MATH 330W.  
**Typically Offered:** Spring only  
Study of the historical development of mathematics, with particular emphasis on the relationship between mathematics and society. 3 hours discussion. (005531)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

MATH 337  Introduction to the Theory of Numbers  
**Prerequisite:** MATH 121, MATH 330W.  
**Typically Offered:** Fall only  
Basic properties of the integers, division algorithm, fundamental theorem of arithmetic, number-theoretic functions, Diophantine equations, congruences, quadratic residues, continued fractions. 3 hours discussion. (005585)  
*Grade Basis:* Graded  
*Repeatability:* You may take this course for a maximum of 3 units 
*Course Attributes:* Upper Division

</table>
MATH 442 Mathematics and the Teaching of Mathematics 3 Units
Prerequisite: MATH 342.
Typically Offered: Fall only
Completes a three course series, started with two semesters of Mathematics for the Credential, MATH 341 and MATH 342. Students compare instructional strategies and explore the role content and pedagogical content knowledge has in these strategies. Central to the class is a lesson study project which entails a cycle of lesson development, implementation, reflection and revision, and implementation again. Students concurrently enrolled in EDTE 535A, Teaching Practicum I for Blended Math Candidates, are able to implement their lesson as part of the practicum, and have a real context for the full content of the course. 3 hours lecture. (020978)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 449 Modern Algebra II 3 Units
Prerequisite: MATH 220, MATH 235, MATH 330W.
Typically Offered: Fall only
Introduction to basic algebraic structures such as groups, ring, and fields. The fundamental concepts of homomorphism, subgroup, normal subgroup and factor group of a group as well as subring, ideal and factor ring of a ring; permutation groups and matrix groups. 3 hours discussion. (005582)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 450 Mathematical Statistics 3 Units
Prerequisite: MATH 220, MATH 330W, MATH 351.
Typically Offered: Fall only
A rigorous theoretical treatment of the following topics: transformations of random variables, estimation, Neyman-Pearson hypothesis testing, likelihood ratio tests, and Bayesian statistics. 3 hours discussion. (005562)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 451 Modern Algebra 3 Units
Prerequisite: MATH 449.
Typically Offered: Spring only odd years
Continuation of MATH 449, topics may include group actions, the Sylow theorems, number fields, finite fields, algebraic extensions, field automorphisms, splitting fields of polynomials, Galois groups, and solvable groups. 3 hours discussion. (021971)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 456 Applied Statistical Methods II 3 Units
Prerequisite: MATH 314 or MATH 315.
Typically Offered: Spring only even years
Advanced topics in applied statistics including multiple and logistic regression, multivariate methods, multi-level modeling, repeated measures, and others as appropriate. The statistical programming language R is used. Appropriate for biology, agriculture, nutrition, business, psychology, social science and other majors. 3 hours discussion. (005570)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 458 Sampling Methods 3 Units
Prerequisite: MATH 314, MATH 315, or MATH 351 (may be taken concurrently).
Typically Offered: Spring only odd years
The theory and application of survey sampling techniques. Topics include simple random sampling, stratified sampling, systematic sampling, and cluster sampling. Appropriate for mathematics, computer science, psychology, social science, agriculture, biology, and other majors. 3 hours discussion. (005573)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 461 Numerical Analysis 3 Units
Prerequisite: MATH 220 or MATH 260; completion of computer literacy requirement.
Typically Offered: Spring only
Approximation; numerical integration; numerical solution of ordinary and partial differential equations; interpolation and extrapolation. 3 hours discussion. (005584)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 465 Introduction to Complex Variables 3 Units
Prerequisite: MATH 220.
Typically Offered: Fall only
Algebra of Complex Numbers, Cauchy-Riemann Equations, the exponential, trigonometric, and logarithmic functions, complex integration and Cauchy integral formula, Taylor and Laurent series, the residue theorem, conformal mapping, and applications. 3 hours discussion. (005577)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 472 Introduction to Chaotic Dynamical Systems 3 Units
Prerequisite: MATH 260. Recommended: MATH 235, MATH 360.
Typically Offered: Fall only odd years
An introduction to the study of non-linear dynamical systems. Both discrete and continuous systems will be studied using classical analysis combined with geometric techniques and computer simulation. Areas of application include fractal geometry, coding theory, fluid turbulence, population fluctuation, and chaotic vibrations of structures and circuits. 3 hours discussion. (005588)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

MATH 475 Calculus of Variations 3 Units
Prerequisite: MATH 220.
Typically Offered: Spring only odd years
Classical problems in the calculus of variations. Euler-Lagrange equations. Isoperimetric problems, Fermat's principle. Lagrangian and Hamiltonian mechanics of particles. Two independent variables. Applications to physics and engineering. 3 hours discussion. (005590)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division
MATH 480 Mathematical Modeling 3 Units  
Prerequisite: MATH 235, MATH 260.  
Typically Offered: Spring only  
The translation of real world phenomena into mathematical language. Possible applications include population and competing species models, mathematical theories of war, traffic flow, river pollution, water waves and tidal dynamics, probabilistic and simulation models. 3 hours discussion. (005592)

MATH 485 Advanced Topics in Data Science 3 Units  
Prerequisite: CSCI 385 or MATH 385; MATH 456 (may be taken concurrently).  
Typically Offered: Spring only  
Getting connected to current events in Data Science and building an online presence. Ethics of predictive analytics and privacy and open data. Reporting and disseminating of research using interactive dashboards and web-publishing. Introduction to current scalable technologies to handle Big Data. Introduction to advanced statistical analysis and machine learning techniques for Data Science. 3 hours lecture. (021890)

Cross listing(s): CSCI 485  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division

MATH 490 Data Science Capstone 1-3 Units  
Prerequisite: MATH 485, senior standing, approved project, enrollment in the Data Science Certificate Program.  
Typically Offered: Fall and spring  
Students work independently to provide a service in the form of a data product to a local business, researcher, or community member. Students provide status reports at weekly meetings and present their finished project to a group of peers at the end of the semester in an appropriate venue such as at an undergraduate seminar series or poster symposium. 0 hours supervision. (021898)

Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division

MATH 495H Honors Thesis 3 Units  
Prerequisite: Admission to the Department Honors Program, completion of MATH 420W with a grade of B or higher.  
Typically Offered: Fall and spring  
Directed reading in an advanced topic under the guidance of an Honors thesis supervisor. The course exceeds the usual level of difficulty associated with undergraduate work. It provides the background necessary to write an Honors thesis. 9 hours supervision. (005595)

Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division

MATH 498 Advanced Topics in Mathematics 1-3 Units  
Prerequisite: At least one 300- or 400-level mathematics course appropriate to the subject, faculty permission.  
Typically Offered: Fall and spring  
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours supervision. (005593)

Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division

MATH 499 Special Problems 1-3 Units  
Prerequisite: Faculty permission.  
Typically Offered: Fall and spring  
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 3 hours supervision. (005594)

Grade Basis: Credit/No Credit  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division

MATH 499H Honors Thesis 3 Units  
Prerequisite: Completion of MATH 495H with a grade of B or higher, and approval by the department Honors advisor and thesis supervisor of the proposed thesis topic.  
Typically Offered: Fall and spring  
Preparation of written thesis in mathematics under supervision of Honors thesis advisor. The thesis, based on studies begun in MATH 495H, will require original work beyond that normally required in undergraduate work. Completed written thesis must be approved by the thesis supervisor and Honors advisor. A summary of the thesis will be presented by the student in public lecture. Successful completion of MATH 495H and MATH 499H is one of the requirements for being designated as an Honors graduate in mathematics. 9 hours supervision. (005596)

Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division

MATH 610 Topics in Mathematics for Secondary Teachers: Analysis 3 Units  
Prerequisite: Admission to the master’s program in mathematics education or instructor permission.  
Typically Offered: Inquire at department  
Through an array of pedagogical strategies, secondary mathematics teachers explore analysis topics appropriate for the secondary school curriculum. These topics and strategies provide a basis for reflective analysis and deepening knowledge of analysis. 3 hours seminar. (005599)

Grade Basis: Report in Progress: ABC/NC  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Graduate Division
MATH 615  Statistical Methods for Graduate Research  3 Units
Prerequisite: MATH 105, MATH 305, MATH 315, or MATH 350 (only one is required).
Typically Offered: Fall only
Introduction to common procedures used to analyze data. Single and
two-sample inference, analysis of variance, multiple regression, analysis
of co-variance, experimental design, repeated measures, nonparametric
procedures, and categorical data analysis. Examples will be drawn from
Biology and related disciplines. Statistical computer packages will be
introduced. Appropriate for biology, agriculture, nutrition, psychology,
social science, and other majors. 3 hours discussion. (005597)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

MATH 620  Topics in Mathematics for Secondary Teachers: Geometry  3 Units
Prerequisite: Admission to the master's program in mathematics
education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore geometry appropriate for the secondary school curriculum. These topics and strategies provide a basis for
reflective analysis and deepening knowledge of geometry. 3 hours seminar. (005602)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 630  Topics in Mathematics for Secondary Teachers: Foundations of Mathematics  3 Units
Prerequisite: Admission to the master's program in mathematics
education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore the foundations of mathematics topics appropriate for the
secondary school curriculum. These topics and strategies provide a
basis for reflective analysis and deepening knowledge of the foundations of mathematics. 3 hours seminar. (005601)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 633  Topics in Mathematics for Secondary Teachers: Number Theory  3 Units
Prerequisite: Admission to the master's program in mathematics
education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore number theory appropriate for the secondary school curriculum. These topics and strategies provide a basis for
reflective analysis and deepening knowledge of number theory. 3 hours seminar. (005605)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 635  Topics in Mathematics for Secondary Teachers: Discrete Mathematics  3 Units
Prerequisite: Admission to the master's program in mathematics education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore discrete mathematics topics appropriate for the
secondary school curriculum. These topics and strategies provide a basis for reflective analysis and deepening knowledge of discrete mathematics. 3 hours seminar. (005600)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 637  Topics in Mathematics for Secondary Teachers: History of Mathematics  3 Units
Prerequisite: Admission to the master's program in mathematics education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore the history of mathematics appropriate for the
secondary school curriculum. These topics and strategies provide a
basis for reflective analysis and deepening knowledge of the history of mathematics. 3 hours seminar. (005603)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 640  Topics in Mathematics for Secondary Teachers: Modern Algebra  3 Units
Prerequisite: Admission to the master's program in mathematics education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore modern algebra topics appropriate for the secondary school curriculum. These topics and strategies provide a basis for reflective analysis and deepening knowledge of modern algebra. 3 hours seminar. (005598)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 650  Topics in Mathematics for Secondary Teachers: Probability and Statistics  3 Units
Prerequisite: Admission to the master's program in mathematics education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics
teachers explore probability and statistics appropriate for the secondary school curriculum. These topics and strategies provide a basis for reflective analysis and deepening knowledge of probability and statistics. 3 hours seminar. (005606)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division
MATH 660  Topics in Mathematics for Secondary Teachers: Mathematical Modeling  3 Units
Prerequisite: Admission to the master's program in mathematics education or instructor permission.
Typically Offered: Inquire at department
Through an array of pedagogical strategies, secondary mathematics teachers explore mathematical modeling appropriate for the secondary school curriculum. These topics and strategies provide a basis for the reflective analysis and deepening knowledge of mathematical modeling. 3 hours seminar. (005604)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 697  Independent Study  1-3 Units
Typically Offered: Fall and spring
This course is a graduate-level independent study offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 3 hours supervision. (005616)
Grade Basis: Report in Progress: Graded
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 698  Grad Advanced Topics in Math  1-3 Units
Typically Offered: Fall and spring
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 9 hours supervision. (005615)
Grade Basis: Graduate Graded
Repeatability: You may take this course more than once
Course Attributes: Graduate Division

MATH 699P  Master's Project  1-3 Units
Typically Offered: Fall and spring
This course is offered for 1.0-6.0 units. You must register directly with a supervising faculty member. 9 hours supervision. (005622)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

MATH 699T  Master's Study  1-3 Units
Typically Offered: Fall and spring
This course is offered for 1.0-6.0 units. You must register directly with a supervising faculty member. 9 hours supervision. (005620)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

Mathematics Education
MTHE 601  Research in Mathematics Education  3 Units
Prerequisite: Admission to a master's degree program in mathematics education or permission of instructor.
Typically Offered: Summer session only
This course will examine research in mathematics education that includes areas of teaching, learning, curriculum, and socio-cultural context. Selected research will be critically reviewed for research design and claims. In a culminating project, students will conduct a review on a specific topic in math education research literature. This is a required course in the MA and MS programs in mathematics education. 3 hours seminar. (005929)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

MTHE 602  Equitable Access to Mathematics in the Secondary Classroom  3 Units
Prerequisite: MTHE 601, Admission to Master's degree program in Math Education.
Typically Offered: Fall only odd years
This course is an examination of literature, theories, and pedagogical practices pertaining to equity in secondary mathematics classrooms and similar settings. Students engage in discussion and analysis of selected readings on equity in Mathematics Education, and students learn about, practice, and reflect on pedagogical techniques to promote equitable access to mathematics. Major assessments occur in portfolio format. 1 hour discussion, 2 hours lecture. (022026)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

MTHE 680  Research Methods in Mathematics Education.  3 Units
Prerequisite: Admission to master's degree program in Mathematics Education, faculty permission.
Typically Offered: Inquire at department
The course focuses on quantitative and qualitative methods to conduct research in mathematics education that informs and strengthens their classroom practice. Successful completion of the course requires students to develop a research proposal. 3 hours supervision. (005930)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

MTHE 690  Thesis/Project Writing Seminar  1-3 Units
Prerequisite: MTHE 680.
Typically Offered: Fall and spring
Formulation and pursuit, with supervision, of advanced projects and theses. The emphasis is on planning, reading, discussing, and evaluating student's manuscript-in-progress. This is a required course in the MA and MS programs in mathematics education. 3 hours seminar. (005931)
Grade Basis: Report in Progress: ABC/NC
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division
