Nutrition and Food Science

Nutrition and Food Science Department (http://www.csuchico.edu/nfsc/)
Holt Hall 369
530-898-6805
Email: nfsc@csuchico.edu
Chair: Joan Giampaoli

Insight

The Department of Nutrition and Food Science is known for our dedicated faculty who are committed to student success. As a student, you will learn from faculty who have the skills, knowledge, and enthusiasm for their various areas of expertise. These include human nutrition, clinical nutrition, food and nutrition management, food science, and counseling and education. Faculty members, in addition to teaching and advising, are actively involved in research and other professional activities.

Facilities include a food and sensory laboratory for courses and research in food science and nutrition. Students learn to use software programs for nutrient analysis, food cost control, recipe and menu evaluation, and electronic health records.

Experience

Students choose from a variety of educational and hands-on experiences. One such opportunity is participating in an externship where students work in a clinical, community, or foodservice setting obtaining valuable real work experience. Examples of externships students have participated in include eating disorders, skilled nursing facilities, hospital settings, school nutrition, quality assurance, sustainability in a university dining hall, and others. Students work closely with a faculty supervisor to guide them through their externship.

In addition to opportunities with individual faculty, the Center for Healthy Communities is closely affiliated with our campus. The CHC provides civic engagement and service-learning externships to more than 120 California State University, Chico students each year. These structured externships—a requirement to apply for CHC student employment, another civic engagement opportunity—are open to students from all colleges and disciplines.

Outlook

Dietitians and nutritionists plan and conduct food service or nutritional programs to help people lead healthy lives. Dietitians and nutritionists work in many settings, including hospitals, nursing homes, clinics, cafeterias, and for state and local governments. Other options span opportunities in food and nutrition, from production through promoting wellness and nutrition support in health care.

The median annual wage for dietitians and nutritionists was $63,090 in May 2020. Employment of dietitians and nutritionists is projected to grow 11 percent from 2020 to 2030, faster than the average for all occupations. About 5,900 openings for dietitians and nutritionists are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force.

Graduates from the option in food and nutrition communication pursue careers in many areas including community nutrition/wellness. Others have found positions in personal training, product development and quality assurance in the food industry, public relations and marketing, and entrepreneurship.

Graduates from the option in nutrition management have found employment as a foodservice director/manager for senior care facilities or school foodservice, distribution specialist for Sierra Nevada Brewing Company, restaurant manager, and dietary manager/director.

Graduates from the general dietetics option have found employment as a clinical dietitian in a hospital, community dietitian for WIC, eating disorder dietitian, diabetes educator, wellness dietitian, or private practice.

Programs

Undergraduate

Bachelor’s

• Nutrition and Food Sciences BS (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/nutrition-food-science/nutrition-food-science-bs/)

Minors

• Food Science Minor (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/nutrition-food-science/food-science-minor/)
• Foodservice Administration Minor (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/nutrition-food-science/foodservice-administration-minor/)
• Nutrition Minor (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/nutrition-food-science/nutrition-minor/)

Graduate

Master’s

• Nutritional Science MS (https://catalog.csuchico.edu/colleges-departments/college-natural-sciences/nutrition-food-science/nutritional-science-ms/)

See Course Description Symbols and Terms (https://catalog.csuchico.edu/academic-standards-policies/course-description-symbols-terms/) for an explanation of course description terminology and symbols, the course numbering system, and course credit units.

NFSC 100 Basic Nutrition 3 Units GE
Typically Offered: Fall and spring
Physiological, social, and psychological factors affecting food intake are examined, as well as relationships of nutrients to health throughout life. Sustainable food practices are explored. 3 hours lecture. (004273)
General Education: Lifelong Learning and Self-Development (E)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division
NFSC 120  Introduction to Food Science  3 Units
Typically Offered: Fall and spring
An elementary study of the chemical, physical and sensory properties of foods. An emphasis on food science principles as they relate to food preparation, ingredient function and interaction, purchasing, storage, nutrient preservation, safety and sanitation. 2 hours discussion, 3 hours laboratory. (004271)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

NFSC 122  Food Safety and Sanitation  2 Units
Typically Offered: Fall only
Knowledge of national (FDA’s Food Code and statewide (California Retail Food Code) health and sanitation principles for retail food facilities. A student may receive a ServSafe® Certification from the National Restaurant Association certification if he or she receives a minimum of 75% on the respective examinations. Good Agricultural Practices are reviewed alongside various food safety topics. 2 hours lecture. (020596)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Lower Division

NFSC 155  Introduction to Nutrition and Food Sciences  1 Unit
Typically Offered: Fall and spring
Introduction to professional associations, legislation, and career opportunities in the Nutrition and Food Sciences major and an introduction to campus resources. 1 hour lecture. (020288)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 1 unit
Course Attributes: Lower Division

NFSC 198  Special Topics  1-3 Units
Typically Offered: Fall and spring
This course is for special topics, which may be offered for 1.0 to 3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours supervision. (006374)
Grade Basis: Graded
Repeatability: You may take this course more than once
Course Attributes: Lower Division

NFSC 200  Health at Every Size: A Non-Diet Approach to Wellness  3 Units GE, USD
Typically Offered: Fall and spring
This course provides an overview of the Health at Every Size paradigm. Topics include size discrimination, social and cultural influences on body dissatisfaction and the adoption of enjoyable physical activity, and mindful eating. 3 hours lecture. (021134)
General Education: Social Sciences (D)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; U.S. Diversity

NFSC 200W  Health at Every Size: A Non-Diet Approach to Wellness (W)  3 Units GE, USD, W
Typically Offered: Fall and spring
This course provides an overview of the Health at Every Size paradigm. Topics include size discrimination, social and cultural influences on body dissatisfaction and the adoption of enjoyable physical activity, and mindful eating. 3 hours lecture. (021256)
General Education: Social Sciences (D)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; U.S. Diversity; Writing Course

NFSC 230  Introduction to Foodservice Administration  3 Units
Typically Offered: Fall and spring
Study of management tools and practices ranging from conceptual to applied as they relate to all aspects of the field of nutrition and food services. 3 hours discussion. (004294)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

NFSC 303  Nutrition and Physical Fitness  3 Units GE
Prerequisite: One lower-division course in biological sciences; GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.
Typically Offered: Fall and spring
Analyzes and evaluates current practices and theories regarding nutrition and its relationship to athletics, weight control, and physical exercise. 3 hours lecture. (004288)
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Health and Wellness Pathway
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 310  Global Nutrition  3 Units GC, GE
Prerequisite: GE Oral Communication (A1); GE Written Communication (A2); GE Critical Thinking (A3); GE Mathematics/Quantitative Reasoning (B4) requirements, or consent of the instructor.
Typically Offered: Fall and spring
This course examines the relationships among human dietary patterns, human biology, and societies. Topics covered include the prevalence of hunger and malnutrition, factors contributing to malnutrition, and the ecology of obesity and chronic diseases in both developing and industrialized nations. Inter-relationships between food systems and major chronic diseases affecting the world population are also examined. Special attention is given to a critical analysis of the biological, environmental and socio-cultural determinants of nutrition-related issues around the world and strategies for addressing those issues. 3 hours lecture. (020508)
General Education: Upper-Division Scientific Inq/Quant Reason (UDB); Agriculture, Food, and Environment Pathway; Global Studies Pathway
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Global Cultures; Sustainable Course
NFSC 318 Nutrition and Disease 3 Units
Prerequisite: NFSC 340.
Typically Offered: Fall and spring
This course is designed to develop skills in the use of clinical nutrition in the prevention and treatment of diet-related health problems, such as cardiovascular disease, diabetes, hypertension, and kidney disease. 3 hours lecture. (020608)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 320 Science of Food 3 Units
Prerequisite: CHEM 107 or CHEM 111, NFSC 120.
Typically Offered: Fall only
Application of principles and methods of physical and sensory analysis of food; effects of functional ingredients, processing, and biotechnology on the food supply. Group research projects are conducted, presented, and evaluated. 2 hours discussion, 3 hours laboratory. (004293)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 340 Human Nutrition 3 Units
Prerequisite: BIOL 104, CHEM 108.
Typically Offered: Fall and spring
Physiological and chemical roles of proteins, lipids, carbohydrates, minerals, vitamins, and water in the functioning of the human body. Factors affecting the digestion of foods, use of nutrients, and the body’s need for nutrients. 3 hours discussion. (004296)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 345W Diet Supplements and Functional Foods (W) 3 Units W
Prerequisite: NFSC 340.
Typically Offered: Spring only
Scientific overview of popular dietary supplements and food phytochemicals and their relation to human health and disease. Current government regulations are also considered. 3 hours lecture. (020289)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Writing Course

NFSC 360 Nutrition Throughout the Life Cycle 3 Units
Prerequisite: BIOL 104; NFSC 100 or NFSC 340.
Typically Offered: Fall and spring
A survey of nutritional needs from conception to death, including the relationship of nutrients to health and well-being and factors which affect food selection of different population groups. 3 hours discussion. (004298)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Writing Course

NFSC 365 Nutrition Counseling and Education 3 Units
Prerequisite: NFSC 360 (may be taken concurrently).
Typically Offered: Fall and spring
Communication skills for nutrition counseling and nutrition education; strategies and techniques for nutrition education; including the development, implementation and evaluation of nutrition education interventions; client-centered nutrition counseling techniques to promote behavior change. 3 hours seminar. (004330)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 389 Nutrition Fieldwork 1-3 Units
Prerequisite: faculty permission.
Typically Offered: Fall and spring
This course is directed fieldwork for 1-3 units. You must register directly with a supervising faculty member. The course provides students with field experience in a variety of campus or community programs. You may be required to purchase professional liability insurance. 0 hours independent study. (020993)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Upper Division

NFSC 398 Special Topics 1-3 Units
Typically Offered: Fall and spring
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours supervision. (006376)
Grade Basis: Graded
Repeatability: You may take this course more than once
Course Attributes: Upper Division

NFSC 399 Special Problems 1-3 Units
Typically Offered: Fall and spring
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 9 hours supervision. (006377)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Upper Division

NFSC 403 Sports Nutrition 3 Units
Prerequisite: CHEM 108 or KINE 323, NFSC 303 or NFSC 340.
Typically Offered: Fall only
Integration of nutrition, physiology, and biochemistry in the examination of the relationship among nutrition, fitness, and exercise performance. Emphasis is on the application of current research finding in regards to nutrition and athletic performance. 3 hours lecture. (015977)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 425 Advanced Food Science 3 Units
Prerequisite: NFSC 320.
Typically Offered: Inquire at department
Development of knowledge and skills in food chemistry, microbiology, processing, packaging, and sensory evaluation, with an emphasis on current food industry practices. 3 hours lecture. (021729)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 425W Cultural Food (W) 3 Units USD, W, GW
Prerequisite: GE Written Communication (A2) requirement, NFSC 120, senior standing.
Typically Offered: Spring only
Study of world food patterns, including food customs of peoples of different ethnic backgrounds. Emphasis upon nutritional significance. Survey of social, economic, religious, and aesthetic aspects of food customs. 2 hours discussion, 3 hours laboratory. (004330)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; U.S. Diversity; Writing Course; Graduation Writing Assessment
Nutrition and Food Science

NFSC 430 Foodservice Procurement and Management 3 Units
Prerequisite: NFSC 120, NFSC 122, NFSC 230.
Typically Offered: Fall and spring
Principles of purchasing for commercial and institution foodservice. A study of the types of food, their distribution, and laws affecting sales and quality; purchase procedures for other supplies and equipment. Preparation of purchase specifications, factors affecting cost control, budgeting, and theories of internal control. 2 hours activity, 2 hours lecture. (004326)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 431W Foodservice Equipment and Production Systems (W) 3 Units W, GW
Prerequisite: GE Written Communication (A2) requirement, NFSC 430.
Typically Offered: Fall and spring
Application of meal production, recipe adaptation and costing, employee and production schedules, environmental health control, inservice training, and logic models. Survey of various foodservice operations. 2 hours discussion, 3 hours laboratory. (004332)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Writing Course; Graduation Writing Assessment

NFSC 440 Advanced Human Nutrition 4 Units
Prerequisite: CHEM 350 or CHEM 451 with a grade of C or higher, NFSC 340.
Typically Offered: Fall only
Theories integrated from physiology, biochemistry, and nutrition with recent developments in the discipline. Emphasis on practical significance of current research and theory. 4 hours seminar. (004331)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

NFSC 445 Futures in Nutrition and Food Science 1 Unit
Prerequisite: Senior standing.
Typically Offered: Spring only
Overview of career opportunities and application procedures for post-baccalaureate programs in the discipline. 1 hour lecture. (004336)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 1 unit
Course Attributes: Upper Division

NFSC 457 Futures in Dietetics 1 Unit
Prerequisite: Senior standing, permission of Didactic Program Director.
Typically Offered: Fall only
Overview of career opportunities in dietetics and application procedures for dietetic internships and other post-baccalaureate programs in the discipline. 1 hour lecture. (020609)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 1 unit
Course Attributes: Upper Division

NFSC 460L Nutrition Counseling Clinical 1 Unit
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
Provides nutrition counseling experience in a peer-led nutrition and exercise program. 3 hours laboratory. (021845)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

NFSC 465 Community Nutrition 3 Units
Prerequisite: NFSC 360, NFSC 365 (may be taken concurrently).
Typically Offered: Fall and spring
Acquaints the student with nutrition programs, approaches, and policies that relate the science of nutrition to the promotion of improved health status among individuals and groups. Principles of community organization, engaged citizenship, policy development, health care systems, sustainable food systems, and issues related to global food insecurity and hunger are addressed. 3 hours lecture. (004333)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 468 Child Nutrition 3 Units
Prerequisite: NFSC 360 or faculty permission.
Typically Offered: Inquire at department
Examines the relationship of food and nutrition with social, cultural and behavioral factors in child and adolescent development. Topics include nutrition and learning, nutrition education, eating disorders, sports nutrition, public policy, food safety and child nutrition programs. 3 hours lecture. (020611)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 469 Nutrition and Aging 3 Units
Prerequisite: NFSC 360 or faculty permission.
Typically Offered: Inquire at department
Designed to provide an overview of the physiological, socioeconomic, psychological, and environmental factors affecting the nutritional status and requirements of older adults. Policies and programs related to health care and nutrition services for older Americans are also addressed. 3 hours lecture. (020612)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 470 Medical Nutrition Therapy I 4 Units
Prerequisite: NFSC 440 (may be taken concurrently).
Typically Offered: Fall only
Investigation of the physiological and biochemical changes imposed on the body by certain disorders as well as by dietary modifications, and analysis of nutritive value of diets prescribed for treatment of disease as part of the nutrition care process. Adaptation of dietary patterns of individuals to special needs. 2 hours activity, 3 hours lecture. (015979)
Grade Basis: Graded

NFSC 471 Medical Nutrition Therapy II 4 Units
Prerequisite: NFSC 470.
Typically Offered: Spring only
A continuation of the investigation of the physiological and biochemical changes imposed on the body by certain disorders as well as by dietary modifications, and analysis of nutritive value of diets prescribed for treatment of disease as part of the nutrition care process. Adaptation of dietary patterns of individuals to special needs. 2 hours activity, 3 hours lecture. (020613)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division
NFSC 475L Nutrition Practicum Clinical 1 Unit
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
Provides fieldwork experience in a healthcare-based nutrition program. 3 hours laboratory. (021588)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Upper Division

NFSC 489 Extternship 1-6 Units
Typically Offered: Fall and spring
This course is an externship offered for 1.0-6.0 units. You must register directly with a supervising faculty member. The externship provides students with preprofessional experience and is designed as a transition to professional practice wherein the student applies learned theory to actual practice. Students may be required to purchase professional liability insurance. 9 hours supervision. (004353)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Upper Division

NFSC 489C Center for Healthy Communities Extternship 1-6 Units
Typically Offered: Fall and spring
This course is an externship offered by the Center for Healthy Communities (CHS) for 1.0-6.0 units. You must submit an application to the CHC to register. The externship provides students with preprofessional community-based experience and is designed as a transition to professional practice wherein the student applies learned theory to actual practice. 0 hours supervision. (021637)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Upper Division

NFSC 498 Special Topics 3 Units
Typically Offered: Fall and spring
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours discussion. (006378)
Grade Basis: Graded
Repeatability: You may take this course more than once
Course Attributes: Upper Division

NFSC 499 Special Problems 1-3 Units
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 3 hours supervision. (006379)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Upper Division

NFSC 499H Honors Senior Thesis or Project 3 Units
Prerequisite: NFSC 100 or NFSC 340; selected screening courses by content area, all with grades which place student in top five percent; interview; faculty permission.
Typically Offered: Fall and spring
An independent study involving substantial research for a thesis or project culminating in a public presentation. Students will enroll in NFSC 499H twice. 9 hours supervision. (004357)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Upper Division

NFSC 530 Nutrition Program Management and Administration 3 Units
Prerequisite: NFSC 431 or faculty permission.
Typically Offered: Inquire at department
Study and application of program and organizational management within the fields of food and nutrition, such as community nutrition and health programs, clinical nutrition administration, and school and hospital foodservice administration. 3 hours lecture. (021446)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 560 Principles of Motivational Interviewing in Nutrition Counseling 3 Units
Prerequisite: KINE 320W or NFSC 365 or faculty permission.
Typically Offered: Fall and spring
This course focuses on developing communication skill for nutrition counseling with Motivational Interviewing (MI) and other nutrition counseling techniques using the principles of Eating Competence, Health at Every Size and Intuitive Exercise. 2 hours activity; 2 hours lecture. (021844)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

NFSC 600 Research Methods in Nutritional Sciences 4 Units
Prerequisite: MATH 105 or MATH 315. Recommended: MATH 615.
Typically Offered: Fall only
An examination of quantitative and qualitative research methods via the analysis of data and the design and implementation of original research and evaluation studies. Activities are designed to develop skills in research design, sampling design, instrumentation, data collection, statistics analysis, presentation and interpretation of results, and the presentation of original research via poster boards and journal manuscripts. 3 hours laboratory, 3 hours lecture. (006380)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Graduate Division; Laptop required

NFSC 601 Nutritional Epidemiology 2 Units
Prerequisite: NFSC 600 (may be taken concurrently).
Typically Offered: Fall only
An examination of research methods used in nutritional epidemiological studies and a critical review of the current state of knowledge regarding diet and other lifestyle-related indicators as factors in disease. 2 hours seminar. (022133)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 2 units
Course Attributes: Graduate Division

NFSC 643 Advanced Topics in Macro and Micronutrients 4 Units
Prerequisite: NFSC 440, biochemistry.
Typically Offered: Spring only
Review of current scientific literature in select aspects of protein, carbohydrates, lipids, and micronutrients and their use by the body. 4 hours lecture. (022134)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Graduate Division
