Innovation, Design, and the Arts is a hands-on minor where technology and aesthetics converge. Your coursework centers on historical, cultural, technological and artistic ideas and skills essential to expanding your creative and innovative potential. This transformational thinking complements any major and translates to any career path.

Students who are already completing the associated General Education Innovation, Design, and the Arts upper-division Pathway can earn the minor by taking six courses from different GE Areas. Students who complete all courses in the minor will meet the University's U.S. Diversity (USD) and Global Cultures (GC) requirements, as well as at least one upper-division Writing (W) course.

Course Requirements for the Minor

The following courses, or their approved transfer equivalents, are required of all candidates for this minor.

Students can earn the minor by taking six courses from different GE Areas. Students who complete all courses in the minor will meet the University's U.S. Diversity (USD) and Global Cultures (GC) requirements, as well as at least one upper-division Writing (W) course.
