## ANTH 111 Introduction to Biological Anthropology

### Description:
The qualities of being human are examined through the investigation of evolutionary principles, non-human primates, human fossil record, and living peoples. The biological origin, evolution, and variation of humankind are explored. Lower division General Education Breadth Area B2, Natural Sciences-Life Forms. 3 hours laboratory, 2 hours lecture. (000491)

### ANTH 113 Human Cultural Diversity

### Description:
With more than six thousand languages spoken worldwide in more than two hundred countries there are innumerable ways to be a human being. This course explores this astonishing diversity to understand the full trajectory of the human species, and to develop solutions to contemporary social problems. We teach geographical knowledge of major world regions, and consider the lives, traditions and present conjunctures of their varied peoples. We emphasize international and cross-cultural study of families, gender, health, religions, and foodways, all in their social, economic, and historical contexts. Finally, we propose long-term, comparative, and scientifically-informed perspectives on human ecologies, and on changing modes of subsistence, production, exchange, and consumption in our increasingly integrated global society. 3 hours lecture. ### ANTH 115 Pop Culture in Museums

### Description:
Movies, comics, video games, and TV only show a sliver of what really happens in a museum. From natural history museums to art museums, we look behind the scenes and separate fantasy from reality. In this course students learn about the important role museums play in our lives. Museums are places of education and entertainment, but they also influence our understanding of the world. We can learn a lot from popular representations of museums. How do we represent other cultures? What do we collect from the past? Does it really belong in a museum? How do we tell if something is a forgery? Who gets to write the script? Students explore these questions and critically evaluate the work of museums. As a class we explore different forms of media, examine a series of case studies, apply concepts to our local museums, and create our own pop culture representation of the museum. 3 hours lecture. <td>Asian civilizations have endured far longer than the societies of Europe and North America. Asia was the center of global trade for thousands of years and remains a major hub for the movement of people, religions, philosophies, goods, and capital. Students in this course learn about the millennial societies and cultures of East and Southeast Asia. Students gain a glimpse into the lives and works of billions of people on the largest continent in the world and the transformations that have shaped Asia today and into the future, such as rise and fall of Angkor Wat, practices of shamanism, Colonialism, the Spice Trade, and Opium, Anime and Kawaii culture, and the global superpower of Communist China. 3 hours lecture. <td>Through an anthropological lens, this course prepares you to tackle the world of pseudoscience by exploring various myths and misconceptions of the past and present through the rigors of science and critical thinking. Equally important, the course discusses the continued public attraction of pseudoscience despite overwhelming evidence to the contrary. We explore epistemology-how we know what we know and how we separate belief from opinion. These overarching themes are applied to specific pseudoscientific claims such as giants, aliens, and “lost” cities, and discuss famous frauds that misled society and set scientific research back several decades. We also examine contemporary beliefs surrounding topics like sex, race, and violence, and delve into hot-button issues like the anti-vaccine and natural foods movements. 3 hours lecture. This course teaches students the ethnographic method of participant-observation along with a suite of other fieldwork methods and approaches. ANTH 311  Survey of Forensic Science  3 Units
Typically Offered: Fall and spring
A survey of the relationship between science and society by noting the history and nature of the role of the expert witness and the forensic scientist in aiding to resolve various legal issues. 3 hours lecture.  (000511)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

ANTH 312  Cataclysmic Events in Human Prehistory  3 Units
Typically Offered: Inquire at department
Through selected case studies, this course examines a series of cataclysmic events, ranging from volcanic eruptions and droughts to massacres and societal collapse, which illustrate that change, even cataclysmic change, is and has long been part of the human experience. The theoretical perspectives which anchor this inquiry into cataclysmic events of the human past are evolutionary, anthropological, and archaeological. 3 hours seminar.  (000512)

ANTH 338  Travel, Fandoms, and the Tourism Industry  3 Units
Typically Offered: Inquire at department
This course examines tourism as a global phenomenon. The emergence of commercial tourism made social and cultural contact into a form of recreation and a booming business. Indeed, contact among diverse cultures has always been an engine of historical change. Students in this course explore dimensions of the tourism industry, motivations for travel, and how tourism transforms landscapes, heritage, and social relations around the world. Sometimes these transformations are for the better, but all too often the quest for the extraordinary destroys the very thing tourists seek. Learn why and how in case studies spanning from Jamaica to Singapore. 3 hours lecture.  (000516)

No part of the world has contributed more to our shared humanity than Africa. With more than a thousand million people speaking fifteen hundred languages in fifty-two countries, this vast continent challenges us to grasp diverse perspectives on value, meaning, and social life. To understand these, our course is full of music, film, arts, and literature, along with classic and innovative anthropological studies. First we study Africa’s main geographical and cultural regions, and their deep histories of peoples, languages, and lifeways. Then we can consider how contemporary issues in spiritual life, family, gender, education, politics, public health, and environment are playing out, all amidst social change and rapid growth that will transform life on our planet for all of us in this twenty-first century. 3 hours lecture. ANTH 424 California Archaeology 3 Units
Prerequisite: ANTH 112 or ANTH 302, or faculty permission.
Typically Offered: Inquire at department
This course provides an overview and examination of the historical development and pre-colonial record of archaeology in California. Topics include archaeological method and theory, cultural chronologies, regional and temporal patterns in the archaeological record, important sites and their potential links to native peoples in California. Controversial issues and contributions to modern archaeology are also considered. 3 hours lecture. (000572)

ANTH 428 Experimental Archaeology 3 Units
Prerequisite: ANTH 302.
Typically Offered: Inquire at department
The primary emphases of this course is to familiarize students with the field of experimental archaeology, introduce them to ancient technologies, and develop their ability to formulate and test hypotheses. Students review the foundational literature of the field, as well as analyze recent studies. They also receive hands-on experience in recreating ancient technologies through in-class exercises. Students then apply what they have learned by designing and implementing their own experimental archaeology projects, and presenting their results in a poster session. 3 hours lecture. (021826)

The sacred is real in all societies, and can be sensed in many ways. Spiritual practice can transform our understanding of reality, reorganize our lives, and shape history. It can be a tool of oppression or the spark of revolutions, a creator of boundaries or a gateway to compassion, transcendence, and communion with the natural world. It has given birth to many of humanity’s greatest intellectual, artistic, and scientific achievements. We explore how these forces are alive and active in a vast range of human cultures around the global. 3 hours lecture. (000577)

ANTH 435 Culture, Health, and Healing 3 Units
Typically Offered: Spring only
This course explores the personal, bodily, and social dimensions of well-being and suffering, emphasizing cross-cultural ethnographic research in many languages and traditions. Film, music, and literature are woven together with anthropological texts and materials. Through studies of witchcraft, gendered violence, chronic illness, and spirit possessions, we examine how experiences such as pain, madness, and ecstasy are produced and understood across a vast array of societies. We compare the body and the person in disparate healing practices, as these each are shaped by varied lifeways and beliefs. We also consider the impact of systemic inequalities, social movements, and population sciences on health and illness worldwide, through studies of child survival, urban poverty, new reproductive orders, and international responses to infectious diseases. 3 hours seminar. ANTH 437 Globalization and Human Rights 3 Units
Typically Offered: Inquire at department
Globalization began long before Columbus invaded the Americas, yet our lives today are ever more shaped by globalized economies, politics, and ideas. Why do these forces sometimes result in plunder, repression, or genocide but sometimes instead bring enhanced well-being and new freedoms? This course explores historical and contemporary global movements of people, commodities, technologies, and ideas. It focuses especially on the emergence of modern human rights as well as their place in today’s postcolonial world. 3 hours lecture. (000582)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units

ANTH 461 People, Objects and Collections 3 Units
Typically Offered: Inquire at department
Have you ever imagined being the behind-the-scenes person who works with the objects that most people only see in museum exhibits? This is your chance to learn how museums collect and care for objects through hands on activities and class discussion. Be accessioning objects into the Museum of Anthropology collections students will practice key skills in handling and caring for collections. We also discuss current issues and approaches in collections management. By the end of the course, students should be able to either pursue a job working at a museum or have a greater appreciation of what happens behind the closed doors. 6 hours activity. (000596)
