## CIVIL ENGINEERING (CIVL)

See Course Description Symbols and Terms (https://catalog.csuchico.edu/academic-standards-policies/course-description-symbols-terms/) for an explanation of course description terminology and symbols, the course numbering system, and course credit units.

### CIVL 101 Introduction to Civil Engineering
- **Typically Offered:** Fall only
- **Prerequisite:** MATH 120 (may be taken concurrently).
- **Course Attributes:** Lower Division
- **Credit:** 1 Unit
- **Description:** Introduction to the profession of Civil Engineering and the various sub-disciplines of Civil Engineering. Overview of the professional engineer licensing process. Overview of the CSU, Chico Civil Engineering curriculum and the disciplinary patterns in the curriculum. Discussion of the importance and purpose of both professional societies and graduate education. 3 hours laboratory. (021141)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 1 unit

### CIVL 130 Surveying
- **Typically Offered:** Fall only
- **Prerequisite:** MATH 120, PHYS 204A.
- **Course Attributes:** Lower Division
- **Credit:** 3 Units
- **Description:** Theory and practice in measurement and computation of distances, angles, and areas on the earth's surface. Error of combined measurements analysis. Use of scientific calculator required. 2 hours discussion, 3 hours laboratory. (001484)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 3 units

### CIVL 140 Transportation Planning, Surveying, and Graphics
- **Typically Offered:** Spring only
- **Prerequisite:** CIVL 130.
- **Course Attributes:** Lower Division
- **Credit:** 3 Units
- **Description:** This course introduces civil engineering design standards, concepts, and procedures related to transportation engineering and construction management. Topics include the standards and design of horizontal curves, vertical curves, and earthwork related to transportation projects in addition to survey staking, state plane coordinates, geographic information systems, and global positioning systems related to project surveying. The laboratory portion of this course includes the application of 3-dimensional graphic modeling software requiring creativity in design, development of construction plans, and operation of modern surveying equipment, such as total stations and GPS systems. 2 hours discussion, 3 hours laboratory. (021126)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 3 units

### CIVL 175 Biological Processes in Environmental Engineering
- **Typically Offered:** Fall and spring
- **Prerequisite:** High school biology and chemistry.
- **Course Attributes:** Lower Division; Sustainable Course
- **Credit:** 3 Units
- **Description:** Introduction to biological processes used in environmental engineering analysis and design with emphasis on sustainability. Ecosystem structure and function, population dynamics, biochemical reactions, photosynthesis, microbial ecology, growth and kinetics. Engineering applications in control of communicable disease, aerobic and anaerobic degradation of organic waste, water quality management, drinking water treatment, wastewater and solid waste treatment, biomass energy, phytotechnology, and bioremediation. 2 hours activity, 2 hours lecture. (021145)
- **General Education:** Laboratory Activity (B3); Life Science (B2)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 3 units

### CIVL 198 Special Topics
- **Typically Offered:** Fall and spring
- **Credits:** 1-3 Units
- **Prerequisite:** MATH 121, PHYS 204A.
- **Course Attributes:** Lower Division
- **Description:** This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. 3 hours lecture. (001490)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course more than once

### CIVL 199 Special Problems
- **Typically Offered:** Fall and spring
- **Prerequisite:** Faculty permission.
- **Course Attributes:** Lower Division
- **Credits:** 1-3 Units
- **Description:** This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 9 hours supervision. (020902)
- **Grade Basis:** Credit/No Credit
- **Repeatability:** You may take this course for a maximum of 6 units

### CIVL 205 Civil Engineering Computing
- **Typically Offered:** Fall and spring
- **Prerequisite:** PHYS 204A (may be taken concurrently).
- **Course Attributes:** Lower Division
- **Credits:** 2 Units
- **Description:** Applications of spreadsheets, python programming, and spatial analysis via geographical informational systems (GIS) to civil engineering problems. 4 hours activity. (001488)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 2 units

### CIVL 211 Statics
- **Typically Offered:** Fall and spring
- **Prerequisite:** MATH 121, PHYS 204A.
- **Course Attributes:** Lower Division; Laptop required
- **Credits:** 3 Units
- **Description:** Force systems, moments, equilibrium, centroids, and moments of inertia. 2 hours activity, 2 hours discussion. (001489)
- **Grade Basis:** Graded
- **Repeatability:** You may take this course for a maximum of 3 units

---

**University Catalog 2022-2023**
CIVL 212  Civil Engineering Materials  3 Units
Prerequisite: CHEM 111.
Typically Offered: Fall and spring
The goal of this course is for you to develop an understanding of several
types of material behaviors, with emphasis on materials commonly
used in the civil engineering profession. Materials studied include wood,
steel, concrete, soil, and asphalt paving materials. Technical writing
and report formatting are emphasized as well. 2 hours activity, 2 hours
lecture. (021735)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division

CIVL 231  Introduction to Environmental Engineering  3 Units
Prerequisite: CHEM 111, CIVL 175 (may be taken concurrently).
Typically Offered: Fall and spring
Introduction to environmental engineering and sustainability. Topics
covered include: global and local environmental issues; UN’s sustainable
development goals; engineering in developing communities; life
cycle assessment; material and energy balances; pollutant fate and
transport; principles of green engineering; and environmental engineering
pathways. 3 hours lecture. (021736)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Lower Division; Sustainable Course; Laptop required

CIVL 302W  Engineering Sustainability and Economic Analysis  3 Units (W)
Prerequisite: GE Written Communication (A2) requirement; MATH 105
and MATH 119, or MATH 121; Junior standing.
Typically Offered: Fall and spring
This course provides a foundation for green engineering design
through life cycle assessment and life cycle cost analysis considering
economically viable, socially just, and environmentally sustainable
solutions (triple bottom line). This course teaches quantitative
environmental and economic assessment tools. decision-making
strategies, risk, sensitivity analysis, and uncertainty analysis. These
skills are applied to real-world problems through group projects,
emphasizing applied engineering, critical thinking, communication skills
and teamwork. 3 hours discussion. (001495)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course; Laptop required;
Writing Course

CIVL 311  Strength of Materials  4 Units
Prerequisite: CIVL 211 with a grade of C- or higher; MATH 260 (may be
taken concurrently); CIVL 212 or MECH 210 (may be taken concurrently).
Typically Offered: Fall and spring
Strength and elastic properties of materials of construction; tension,
compression, shear, and torsion stresses; deflection and deformation;
stress analysis of beams and columns. 4 hours discussion. (001491)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

CIVL 313  Structural Mechanics  3 Units
Prerequisite: CIVL 311 with a grade of C- or higher; CIVL 205 (may be
taken concurrently) or MECH 208 (may be taken concurrently).
Typically Offered: Fall and spring
Fundamentals of structural analysis for beams, trusses, and frames.
Topics include loading (including seismic), influence lines, approximate
analysis methods, deflection analysis, and statically indeterminate
structures. Methods applicable to computer analysis are introduced. 3
hours discussion. (001499)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Laptop required

CIVL 321  Fluid Mechanics  4 Units
Prerequisite: CIVL 211 with a grade of C- or higher. Recommended:
MATH 260, MECH 320 (may be taken concurrently).
Typically Offered: Fall and spring
Hydrostatics, principles of continuity, work-energy and momentum,
viscous effects, dimensional analysis and similitude, flow in
closed conduits, drag on objects. 3 hours discussion, 3 hours
laboratory. (001496)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

CIVL 331  Environmental Engineering Chemistry  3 Units
Prerequisite: CIVL 231.
Typically Offered: Fall only
Chemical principles applicable to the analysis of natural and
engineered water systems including acid base chemistry, precipitation
dissolution, oxidation-reduction, adsorption-desorption, and
complexation. 2 hours activity, 2 hours lecture. (021737)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

CIVL 389  Internship in Civil Engr  1-3 Units
Prerequisite: Approval of supervising faculty member prior to off-campus
assignment.
Typically Offered: Fall and spring
This course is an internship offered for 1.0-3.0 units. You must register
directly with a supervising faculty member. This program is designed for
students who wish to gain practical work experience with participating
civil engineering firms/organizations. 3 hours lecture. (001504)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Upper Division

CIVL 389M  Summer Internship in Civil Engineering  1-3 Units
Prerequisite: Approval of supervising faculty member prior to off-campus
assignment.
Typically Offered: Summer session only
This course is an internship offered for 1.0 - 3.0 units. You must register
directly with a supervising faculty member. This program is designed for
students who wish to gain practical work experience with participating
civil engineering firms/organizations. 0 hours supervision. (021287)
Grade Basis: Credit/No Credit
Repeatability: You may take this course for a maximum of 15 units
Course Attributes: Upper Division

**Courses are updated periodically. Always check the latest information in the official university catalog.**
CIVL 499 Special Problems  1-3 Units  
Prerequisite: Faculty permission.  
Typically Offered: Fall and spring  
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 3 hours supervision.  (001539)  
Grade Basis: Credit/No Credit  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division  

CIVL 499H Honors Project  3 Units  
Prerequisite: Completion of 12 units of upper-division C E courses, faculty permission.  
Typically Offered: Inquire at department  
This course may be taken twice for a maximum of 6 units. Prerequisite to the second semester is a B or higher in the first semester. Open by invitation to C E majors who have a GPA among the top 5% of C E students based upon courses taken at CSU, Chico. This is an “Honors in the Major” course; a grade of B or higher in 6 units of 499H certifies the designation of "Honors in the Major" to be printed on the transcript and the diploma. Each 3-unit course will require both formal written and oral presentations. 9 hours supervision.  (001540)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 6 units  
Course Attributes: Upper Division  

CIVL 511 Foundations Engineering  3 Units  
Prerequisite: CIVL 411, CIVL 415 (may be taken concurrently).  
Typically Offered: Inquire at department  
The application of soil mechanics principles to the design of foundations for buildings and earth structures. Integration of structural design and soil response. 3 hours discussion.  (001513)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division  

CIVL 554 Steel Design  3 Units  
Prerequisite: CIVL 313.  
Typically Offered: Inquire at department  
Theory, analysis, and design of steel structural elements and systems using the Load and Resistance Factor Design (LRFD) method. 3 hours discussion.  (001500)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Laptop required  

CIVL 556 Timber Design  3 Units  
Prerequisite: CIVL 313.  
Typically Offered: Inquire at department  
Theory and design procedures for timber structures and their connections to resist gravity and lateral loads. Basic element design by the Allowable Stress Design (ASD) and/or Load and Resistance Factor Design (LRFD) methods are detailed. Also covered is design of floor and roof systems and shear walls. One or two 3-hour field trips required. 3 hours discussion.  (001516)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division  

CIVL 556H Timber Design - Honors  3 Units  
Prerequisite: CIVL 313.  
Typically Offered: Inquire at department  
Theory and design procedures for timber structures and their connections to resist gravity and lateral loads. Basic element design by the Allowable Stress Design (ASD) and/or Load and Resistance Factor Design (LRFD) methods are detailed. Also covered is design of floor and roof systems and shear walls. One or two 3-hour field trips required. 3 hours discussion.  (020404)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division  

CIVL 558 Earthquake and Wind Engineering  3 Units  
Prerequisite: CIVL 415, CIVL 554, or CIVL 556.  
Typically Offered: Inquire at department  
Earthquake and wind hazard related to the structural design of buildings. Topics include engineering seismology, wind environment and climatology, structural dynamics, structural loading, and design methodologies. Use of computer software for the static and dynamic analysis of three-dimensional building systems. 2 hours activity, 2 hours discussion.  (001518)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Laptop required  

CIVL 558C Earthquake and Wind Engineering - Capstone  3 Units  
Prerequisite: CIVL 415, CIVL 554, or CIVL 556.  
Corequisites: CIVL 595W.  
Typically Offered: Inquire at department  
Earthquake and wind hazard related to the structural design of buildings. Topics include engineering seismology, wind environment and climatology, structural dynamics, structural loading, and design methodologies. Use of computer software for the static and dynamic analysis of three-dimensional building systems. 2 hours activity, 2 hours discussion.  (021175)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  

CIVL 558H Earthquake and Wind Engineering - Honors  3 Units  
Prerequisite: CIVL 313, MATH 260. Recommended: Concurrent enrollment in or prior completion of CIVL 415, CIVL 554, CIVL 556.  
Typically Offered: Inquire at department  
Earthquake and wind hazard related to the structural design of buildings. Topics include engineering seismology, wind environment and climatology, structural dynamics, structural loading, and design methodologies. Use of computer software for the static and dynamic analysis of three-dimensional building systems. 2 hours activity, 2 hours discussion.  (020405)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Laptop required  

CIVL 561 Hydrology and Open Channels Hydraulics  3 Units  
Prerequisite: CIVL 461.  
Typically Offered: Inquire at department  
Principles and applications of modern hydrology, precipitation, surface-water runoff, and open channel hydraulics. Includes topics in urban hydrology, stormwater controls and pollution controls. 2 hours activity, 2 hours discussion.  (001526)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course; Laptop required
CIVL 561C Hydrology and Open Channel Hydraulics  
Capstone  
Prerequisite: CIVL 461.  
Corequisites: CIVL 595W.  
Typically Offered: Fall and spring  
Principles and application of modern hydrology, precipitation, surface-water runoff, and open channel hydraulics. Includes topics in urban hydrology, stormwater controls, and pollution controls. 2 hours activity, 2 hours discussion. (021246)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course; Laptop required

CIVL 562 Groundwater Hydrology  
Prerequisite: CIVL 461.  
Typically Offered: Inquire at department  
An introduction to modern groundwater hydrology emphasizing quantitative analysis of subsurface flow. Topics include well hydraulics, stream/aquifer interactions, and contaminant transport. Use of modeling tools and techniques is emphasized. 2 hours activity, 2 hours discussion. (001498)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course; Laptop required

CIVL 562C Groundwater Hydrology - Capstone  
Prerequisite: CIVL 461.  
Corequisites: CIVL 595W.  
Typically Offered: Inquire at department  
An introduction to modern groundwater hydrology emphasizing quantitative analysis of subsurface flow. Topics include well hydraulics, stream/aquifer interactions, and contaminant transport. Use of modeling tools and techniques is emphasized. 2 hours activity, 2 hours discussion. (021177)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course

CIVL 564 Spatial Hydrology  
Prerequisite: CIVL 461; ERTH 380 for ERTH majors.  
Typically Offered: Inquire at department  
This course builds on aspects of the rapidly emerging field of spatial hydrology, GIS, and Python introduced during earlier coursework. As spatially explicit remotely sensed and numerically modeled hydrology and climate datasets continue to increase, students need new tools to manage, analyze, and visualize them. This course focuses on applying two core tools already introduced to students in earlier classes (i.e. geographic information systems (GIS) and Python) to a culminating capstone project focused on managing, analyzing, and visualizing how real-world hydrology and climate data sets are changing in space and time. 2 hours activity, 2 hours lecture. (022208)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Laptop required

CIVL 564C Spatial Hydrology - Capstone  
Prerequisite: CIVL 461; ERTH 380 for ERTH majors.  
Corequisites: CIVL 595W.  
Typically Offered: Inquire at department  
This course builds on aspects of the rapidly emerging field of spatial hydrology, GIS, and Python introduced during earlier coursework. As spatially explicit remotely sensed and numerically modeled hydrology and climate datasets continue to increase, students need new tools to manage, analyze, and visualize them. This course focuses on applying two core tools already introduced to students in earlier classes (i.e. geographic information systems (GIS) and Python) to a culminating capstone project focused on managing, analyzing, and visualizing how real-world hydrology and climate data sets are changing in space and time. 2 hours activity, 2 hours lecture. (021240)  
Grade Basis: Graded  
Repeatability: You may take this course for a maximum of 3 units  
Course Attributes: Upper Division; Sustainable Course; Laptop required
CIVL 573 Water Quality and Contaminant Transport  \(\star\) 3 Units  
**Prerequisite:** CIVL 231 or CIVL 431.  
**Typically Offered:** Inquire at department  
This course introduces and develops fundamental chemical concepts that explain pollutant fate and transport in soil, water, and air. In addition to chemical concepts, students learn how to develop and apply remediation strategies based on contaminant behavior. Remedial system design addresses topics such as acid mine drainage, organic solvent contaminated groundwater, crude oil in surface water, and other areas of student interest. 3 hours discussion. (001535)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Sustainable Course; Laptop required

CIVL 575 Solid and Hazardous Waste Management  \(\star\) 3 Units  
**Prerequisite:** CIVL 431 or faculty permission.  
**Typically Offered:** Inquire at department  
An introduction to the handling and management of solid and hazardous wastes. Emphasis on state-of-the-art engineering techniques and contemporary management issues based on social, economic, and legal considerations; risk assessment; case studies. Special emphasis on problems of developing countries. 3 hours discussion. (001536)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Sustainable Course

CIVL 575C Solid and Hazardous Waste Management - Capstone  \(\star\) 3 Units  
**Prerequisite:** CIVL 431 or faculty permission.  
**Corequisites:** CIVL 595W.  
**Typically Offered:** Inquire at department  
An introduction to the handling and management of solid and hazardous wastes. Emphasis on state-of-the-art engineering techniques and contemporary management issues based on social, economic, and legal considerations; risk assessment; case studies. Special emphasis on problems of developing countries. 2 hours activity, 2 hours discussion. 3 hours discussion. (021326)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Sustainable Course

CIVL 586 Advanced Transportation Engineering Design  \(\star\) 3 Units  
**Prerequisite:** CIVL 441.  
**Typically Offered:** Spring only  
This course presents selected topics in advanced transportation engineering techniques, design, and analysis. These topics cover the advanced technologies in the areas of transportation pavements, transportation materials, traffic engineering, and travel demand modeling. The course is also designed to equip students with practical design oriented experience with comprehensive knowledge learned through previous transportation related classes. 3 hours discussion. (021248)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Laptop required

CIVL 586C Advanced Transportation Engineering Design - Capstone  3 Units  
**Prerequisite:** CIVL 441.  
**Corequisites:** CIVL 595W.  
**Typically Offered:** Spring only  
This course presents selected topics in advanced transportation engineering techniques, design, and analysis. These topics cover the advanced technologies in the areas of transportation pavements, transportation materials, traffic engineering, and travel demand modeling. The course is also designed to equip students with practical design oriented experience with comprehensive knowledge learned through previous transportation related courses. 2 hours activity, 2 hours discussion. (021261)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Laptop required

CIVL 592 Construction Engineering and Management  \(\star\) 3 Units  
**Prerequisite:** CIVL 302W (may be taken concurrently), CIVL 411.  
**Typically Offered:** Inquire at department  
Introduction to construction engineering and management. Cost estimation for contract construction and engineering, including labor, material, equipment, and overhead costs. Construction procedures, equipment and methods; efficient use of excavation and hauling equipment operations. Application of crew balance, process chart and operations research techniques to construction operations. Planning, scheduling, and progress controls of construction operations. One or two three-hour field trips may be required. 3 hours discussion. (001510)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Laptop required

CIVL 595W Capstone Design Project (W)  \(\star\) 3 Units W, GW  
**Prerequisite:** GE Oral Communication (A1) requirement, GE Written Communication (A2) requirement; Junior standing.  
**Corequisites:** CIVL 558C, CIVL 561C, CIVL 562C, CIVL 564C, CIVL 571C, CIVL 575C, or CIVL 586C.  
**Typically Offered:** Fall and spring  
This course provides a broad-based capstone design experience in a coordinated semester long project. In support of the design project, emphasis is placed on fundamentals of technical writing, contracts, and specifications common to many fields of civil engineering. 3 hours discussion. (021174)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course for a maximum of 3 units  
**Course Attributes:** Upper Division; Writing Course; Graduation Writing Assessment

CIVL 598 Advanced Special Topics  \(\star\) 1-3 Units  
**Prerequisite:** To be established when courses are formulated.  
**Typically Offered:** Fall and spring  
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See The Class Schedule for the specific topic being offered. 3 hours lecture. (020084)  
**Grade Basis:** Graded  
**Repeatability:** You may take this course more than once  
**Course Attributes:** Upper Division
CIVL 599  Special Problems  1-3 Units
Prerequisite: Faculty permission.
Typically Offered: Inquire at department
This course is an independent study of special problems offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 0 hours supervision.  (020171)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Upper Division; Laptop required

CIVL 682  Introduction to Pavement Preservation  3 Units
Prerequisite: Bachelor's Degree or faculty permission.
Typically Offered: Inquire at department
An overview of terms related to pavement management systems and their use in identifying both functional and structural distresses in flexible and rigid pavement and their role in pavement preservation strategies. 3 hours lecture.  (020773)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division; Sustainable Course

CIVL 684  Rigid Pavement Preservation  3 Units
Prerequisite: CIVL 682 or faculty permission.
Typically Offered: Inquire at department
Rigid pavement distress causes and measurements; project selection for preservation methods; construction best practices for preservation, maintenance, and rehabilitation processes. 3 hours lecture.  (020775)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division; Sustainable Course

CIVL 697  Independent Study  1-3 Units
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
This course is a graduate-level independent study offered for 1.0-3.0 units. You must register directly with a supervising faculty member. 9 hours supervision.  (001551)
Grade Basis: Report in Progress: Graded
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

CIVL 698  Special Topics  1-3 Units
Prerequisite: Department permission.
Typically Offered: Fall and spring
This course is for special topics offered for 1.0-3.0 units. Typically the topic is offered on a one-time-only basis and may vary from term to term and be different for different sections. See the Class Schedule for the specific topic being offered. 3 hours lecture.  (001550)
Grade Basis: Graduate Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Graduate Division

CIVL 699T  Master's Thesis  1-6 Units
Prerequisite: Faculty permission.
Typically Offered: Fall and spring
This course is a master's study offered as either a Master's Thesis or as a Master's Project for 1.0-6.0 units. You must register directly with a supervising faculty member. 3 hours supervision.  (001555)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division

CIVL 699P  Master's Project  1-6 Units
Prerequisite: See the department secretary.
Typically Offered: Fall and spring
This course is offered for 1.0-6.0. You must register directly with a supervising faculty member. 3 hours supervision.  (001558)
Grade Basis: Report in Progress: CR/NC
Repeatability: You may take this course for a maximum of 6 units
Course Attributes: Graduate Division
