### PLANT AND SOIL SCIENCE (PSSC)

See Course Description Symbols and Terms (https://catalog.csuchico.edu/academic-standards-policies/course-description-symbols-terms/) for an explanation of course description terminology and symbols, the course numbering system, and course credit units.

</table>
PSSC 309B Directed Work in Vegetable Crops 2 Units
Typically Offered: Fall and spring
Directed work and discussion on all aspects of vegetable crop production practices applicable to northern California. 2 hours activity, 1 hour discussion. (007788)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

PSSC 330 Rangeland Resources and Management 3 Units
Typically Offered: Fall only
A survey of North American rangeland resources and the principles of their use and management, including basic plant-animal-soil relationships and multiple uses. 3 hours lecture. (007775)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

PSSC 340 Economic Entomology 4 Units
Typically Offered: Fall only
A survey of the structure and function of insects, leading to a fundamental understanding of applied insect ecology and taxonomy. Particular emphasis is placed on arthropod species of economic importance to humans. 3 hours laboratory, 3 hours lecture. (007797)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 4 units
Course Attributes: Upper Division

PSSC 343 Introduction to Weed Science 3 Units
Prerequisite: AGRI 331.
Typically Offered: Spring only
Identification, modes of spread, and population ecology of weeds and other invasive plant species. Biological, cultural, mechanical, and chemical control of weeds and invasive species. Methods of crop/vegetation management to control and reduce weed populations. 3 hours laboratory, 2 hours lecture. (007801)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

PSSC 345 Horticultural Therapy 3 Units
Typically Offered: Spring only
An introductory course in horticultural production as therapy. Focus is on the therapeutic benefits available to people engaging in horticultural activities. Covers the special needs associated with elderly, veterans, children and adolescents, and people with disabilities. Overview of techniques and training requirements for therapists in garden and greenhouse activates. Applicable to students in recreation, kinesiology, nursing, psychology and horticulture. This course fulfills a partial requirement for becoming a registered horticultural therapist. 3 hours lecture. (021807)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

PSSC 353 Plant Protection Materials, Methods, and Regulations 3 Units
Prerequisite: CHEM 107 or CHEM 111; PSSC 250.
Typically Offered: Fall only
An examination of materials and application methods used for protecting the health of plants in a manner that is safe for the environment, applicator, and consumer. Comprises the laws and regulations, safety, application, properties, mode of action, toxicology, and environmental impacts of pesticides, fertilizers, and other materials used in agriculture. 3 hours laboratory, 2 hours lecture. (007806)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course

PSSC 356 Soil Quality and Health 3 Units
Prerequisite: PSSC 250 or instructor permission.
Typically Offered: Spring only
Course examines the capacity of the soil to function within natural and managed ecosystems to sustain plant/animal productivity, maintain or enhance water and air quality, and support human health and habitation. Soil quality factors include biological, physical, and chemical soil properties. 2 hours activity, 2 hours lecture. (007808)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division; Sustainable Course

PSSC 361 Production of Annual Crops 3 Units
Prerequisite: PSSC 101.
Typically Offered: Fall only
This course covers the requirements and cultural practices needed for maximizing yields of annual field crops. Principles affecting growth development and management will be covered. For field experience, students are advised to enroll in PSSC 309A/PSSC 309B. 3 hours laboratory, 2 hours lecture. (007810)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

PSSC 363 Forage Crops 3 Units
Prerequisite: PSSC 101 or PSSC 330.
Typically Offered: Inquire at department
Grasses and legumes; their production and management for irrigated pastures, hay, silage, and seed. Plant characteristics and adaptation. 3 hours laboratory, 2 hours lecture. (007812)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division

PSSC 365 Sustainable Vegetable Crop Production 3 Units
Prerequisite: PSSC 101.
Typically Offered: Fall only
An experiential, field-oriented course covering origin, nutrition, environmental requirements, and management strategies for the sustainable production of vegetables. It provides students with the opportunity to appreciate the vast array of vegetables in the world and develop management skills for commercial production of vegetables in a sustainable manner. 3 hours lecture. (021404)
Grade Basis: Graded
Repeatability: You may take this course for a maximum of 3 units
Course Attributes: Upper Division
Course Attributes:

Repeatability:

Grade Basis:

Agriculture, Food, and Environment Pathway; Global Studies Pathway

General Education:

but open to them. 3 hours lecture.  (007820)

Grade Basis: Graded

Repeatability: You may take this course for a maximum of 3 units

Course Attributes: Upper Division

PSSC 369  Seed Production

Prerequisite: PSSC 101

Typically Offered: Spring only

This is an overview of seed production principles and practices that involves discussion of suitable environmental and nutritional conditions, as well as specific applied methods for individual important crops to produce quality seeds for the market. The lectures provide a general overview through detailed presentations. Students will also be involved in student-led presentations and discussions on seed production practices of specific crops. Seed testing methods and identification skills will also be emphasized. 3 hours lecture.  (022195)

Grade Basis: Graded

Repeatability: You may take this course for a maximum of 3 units

Course Attributes: Upper Division

PSSC 399  Special Problems

Prerequisite: Upper-division standing.

Typically Offered: Fall and spring

This course is for special topics offered for 1.0 - 3.0 units. Typically the topic is offered on a one-time-only basis and may vary from semester to semester and be different for different sections. See the class schedule for the specific topic being offered. 3 hours seminar.  (007827)

Grade Basis: Graded

Repeatability: You may take this course more than once

Course Attributes: Upper Division

PSSC 441  Principles of Integrated Pest Management

Prerequisite: AGRI 331; BIOL 446, PSSC 340, or PSSC 343.

Typically Offered: Spring only

An introduction to the principles and mechanisms of integrated management of insect pests, plant pathogens, and weeds, dealing with such areas as the agro-ecosystem, population dynamics, and specific approaches to pest management. 3 hours lecture.  (007834)

Grade Basis: Graded

Repeatability: You may take this course for a maximum for 3 units

Course Attributes: Upper Division; Sustainable Course

PSSC 451  Soil Genesis and Classification

Prerequisite: PSSC 250 or faculty permission.

Typically Offered: Spring only

An examination of the factors of soil formation, criteria and systems of soil classification. The laboratory consists of five all-day field trips. 3 hours laboratory, 2 hours lecture.  (007837)

Grade Basis: Graded

Repeatability: You may take this course for a maximum of 3 units

Course Attributes: Upper Division

<td>This course is designed to examine the yield potential of field crops in various environments. Students learn about the importance of crop physiology in crop production and breeding. Topics include canopy architecture and radiation interception, photosynthesis and respiration, carbon and nitrogen allocation, plant-water relationships, and plant response to restricted environments. The course provides practical experience using instrumentation to measure physiological processes in laboratory and field. Special emphasis includes design of field and greenhouse experiments. 3 hours laboratory, 3 hours lecture.</td>
